MANAGEMENT REVIEW INTELLIGENCE

Al Assiel Restaurant & Shisha

Executive story, operational evidence and action ownership

Bonn, Germany

298 Google reviews | 220 written reviews | Data through 03 Sep 2026

Presentation Roadmap

HOW TO USE THIS DECK

1 Executive Overview Main story and priority
2 Last-Month Performance Latest vs previous 30d
3 Performance Trends Monthly and 90d context
4 Review Flow & Response Cadence and follow-up
5 Bad Reviews Patterns and 30 operational cases
6 Service Repeated weakness evidence
7 Kitchen / Food / Taste Strength plus recent checks
8 Bar & Drinks Attention and experience signals
9 Buffet Sentiment and monitoring needs
10 Menu & Ordering Review limits and POS needs
11 Dishes Mentioned All observed items
12 Management Observations Provenance-separated inputs
13 Action Plan Immediate vs evidence-dependent work
14 Delegation Four accountable workstreams
15 KPI Tracking Weekly control dashboard
16 Evidence Appendix Case registers, links and checklists

Start Chapter 1 →
Open Evidence Appendix →

CHAPTER 1

Executive Overview

WHAT IT PROVES

The lifetime reputation is strong, but recent experience and follow-up are weaker.

WHY IT MATTERS

Management should protect the brand while acting on current operating signals.

ACTION SUPPORTED

Set the management priority and open the evidence only where needed.

Open chapter →

Strong reputation; recent performance still needs attention

CHAPTER 1 - EXECUTIVE OVERVIEW

GOOGLE RATING	TOTAL REVIEWS	HISTORICAL AVG.	RECENT 90D AVG.
4.5	298	4.57	3.68

WHAT REMAINS STRONG

Collected average 4.483; 86.6% of ratings are 4-5 stars. Food, Taste and friendliness remain visible strengths.

WHAT NEEDS CONTROL

Recent 90d: 3.68 across 28 reviews, 32.1% negative vs 7.8% historically. Owner response remains weak.

Management implication: Protect strengths, restore the recent experience, and close the response-loop gap.

View trend evidence →

View 30 bad-review cases →

CHAPTER 2

Last-Month Performance

WHAT IT PROVES

The latest 30d improved versus the prior 30d, but four low-score cases remain.

WHY IT MATTERS

Averages alone can hide open cases and low-evidence emerging topics.

ACTION SUPPORTED

Review all 14 recent cases and compare them with the six prior cases.

Open chapter →

Latest 30 days improved, with four low-score cases still open

CHAPTER 2 - LAST-MONTH PERFORMANCE

Latest 30 days: 05 Aug 2026 to 03 Sep 2026. Previous 30 days: 06 Jul 2026 to 05 Aug 2026.

LATEST 30 DAYS

AVERAGE	REVIEWS
3.93	14

11 written | 3.27/week | 28.6% negative | 4 low-score | 0.0% response

PREVIOUS 30 DAYS

AVERAGE	REVIEWS
3.67	6

5 written | 1.40/week | 33.3% negative | 2 low-score | 0.0% response

Average +0.26 stars; negative share -4.76 pp; volume 6 → 14. Improvement does not close the four low-score cases.

View detailed comparison → | View all 14 recent cases → | View six prior cases →

The 30-day improvement contains mixed and low-evidence signals

CHAPTER 2 - TOPIC-LEVEL COMPARISON

IMPROVED

Taste and Service each had **7 positive reviews**. Overall average improved and review cadence increased. Evidence labels are based on supporting sentiment reviews.

NEEDS REVIEW

Food had **2 negative reviews** (Low evidence). Four low-score reviews arrived; none received an owner response.

STILL UNCLEAR

Taste, Service, Menu/Tablet, communication and parking each have only one negative recent review. Drinks has two neutral mentions. Investigate; do not overstate.

View counts and chart →

Open case register →

CHAPTER 3

Performance Trends

WHAT IT PROVES

Recent 90d performance sits below the historical pattern across rating and negative share.

WHY IT MATTERS

Monthly edges are partial and the lifetime score moves slowly.

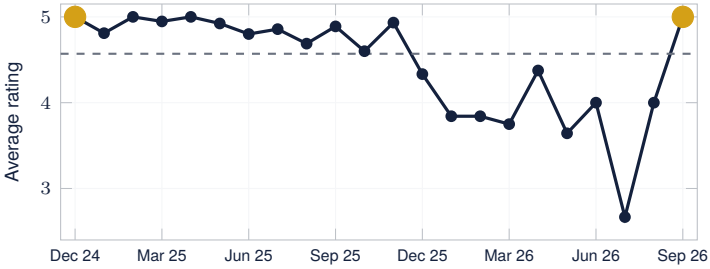

ACTION SUPPORTED

Use rolling 30d/90d control and inspect volume plus low-score counts.

Open chapter →

Monthly rating shows a recent gap; edge months are partial

CHAPTER 3 - MONTHLY AVERAGE RATING

RECENT 90D

3.68

28 reviews | 32.1% negative

HISTORICAL

4.57

270 reviews | 7.8% negative

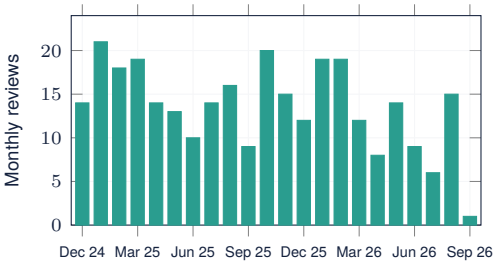

Gold points mark partial Dec 2024 and Sep 2026. Do not treat them as full-month volumes.

Historical: 24 Dec 2024 to 06 Jun 2026. Recent 90d: 06 Jun 2026 to 03 Sep 2026.

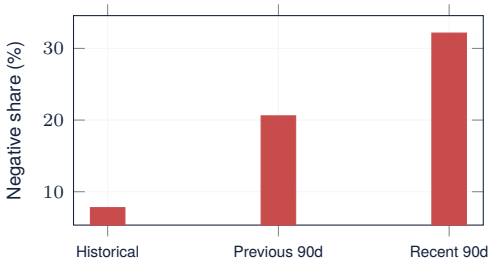

View trend evidence →

Review volume and low-score volume must be read together

CHAPTER 3 - VOLUME AND RECENT-VS-HISTORICAL COMPARISON

Monthly volume; Dec 2024 and Sep 2026 are partial.

Recent 90d negative share is materially above history; period count is 28.

View monthly tables and structured trends →

CHAPTER 4

Review Flow & Owner Response

WHAT IT PROVES

Reviews arrive frequently enough to detect change, but recent owner response is inactive.

WHY IT MATTERS

Unanswered feedback leaves recovery and learning opportunities open.

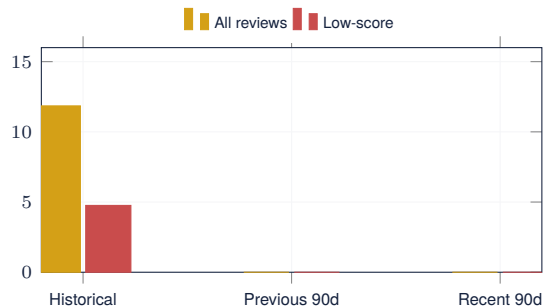

ACTION SUPPORTED

Assign a response owner, deadline and closure process.

Open chapter →

Feedback arrives every two days; the response loop is inactive

CHAPTER 4 - REVIEW FLOW & OWNER RESPONSE

Periods: historical 24 Dec 2024-06 Jun 2026; recent 90d 06 Jun 2026-03 Sep 2026.

View response evidence →

View closure process →

OVERALL RESPONSE
10.74%

RECENT 30D
0.0%

LOW-SCORE
3.33%

UNANSWERED
29/30

Latest 30d cadence: 3.27/week; one review every 2.00 days. Median delay among answered reviews: 5.3 days.

CHAPTER 5

Bad Reviews / Low-Score Cases

WHAT IT PROVES

Thirty 1-2 star reviews define a finite operational workload with repeated Service, Food and Value issues.

WHY IT MATTERS

Twenty-nine are unanswered; vague summaries are not enough for closure.

ACTION SUPPORTED

Assign every case, examine patterns, respond and document internal checks.

Open chapter →

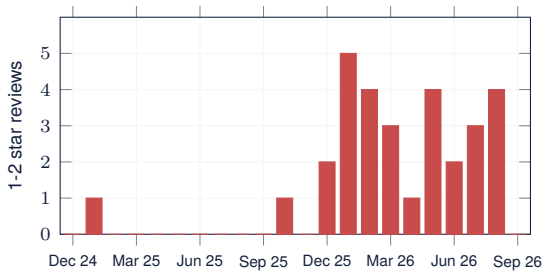

Thirty bad reviews define the follow-up workload

CHAPTER 5 - BAD-REVIEW SCALE

1-STAR	2-STAR
20	10
16 written	8 written

30 10.07% of all reviews

24 written; 29 unanswered. Latest 30d: 4. Recent 90d: 9.

Monthly low-score volume; edge months are partial.

Open all 30 cases →

View pattern analysis →

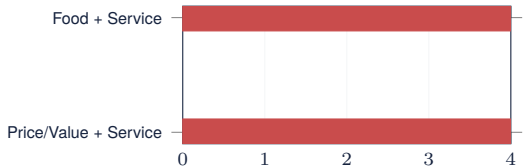

Repeated bad-review issues and co-occurrences guide investigation

CHAPTER 5 - PATTERN MAP

REPEATED NEGATIVE AREAS

Service	9 | 30.0%	Medium
Food	10 | 33.3%	Medium
Price & Value	5 | 16.7%	Medium
Taste	6 | 20.0%	Medium
Menu/Tablet	1 | low volume	LOW

CO-OCCURRENCE CHART

All other pairs occur once. Co-occurrence directs internal checks; it does not prove root cause. Day/time and shift data are unavailable.

View full patterns →

View recent shift →

Treat every bad review as an operational case, not a quote

CHAPTER 5 - OPERATIONAL CASE DESIGN

CASE INTAKE

Anonymous case ID, rating/date, positive/negative topics, item/buffet/drinks/menu flags, written/no-text and public original-review link.

OWNERSHIP

Proposed workstream owner, 48-hour public-response target, issue-specific internal check and response date when available.

CLOSURE

Keep the case open until the internal check and action are documented. Current internal-resolution fields are unavailable.

View 30-case register →

View response checklist →

CHAPTER 6

Service

WHAT IT PROVES

Service is mostly positive, yet it is the clearest repeated weakness in low-score reviews.

WHY IT MATTERS

Repeated waiting, responsiveness and communication failures can outweigh many positive mentions.

ACTION SUPPORTED

Investigate all negative cases by journey stage and future shift/time fields.

Open chapter →

Service is positive overall and still the clearest recurring weakness

CHAPTER 6 - SERVICE

HISTORICAL

127 mentions | 7 negative | Medium weakness evidence

RECENT 90D

17 mentions | 3 negative | Low weakness evidence

Latest 30d: 10 mentions; 1 negative (Low evidence).
Structured rating: 4.62.

“The service is incredibly unfriendly, and we had to wait a very long time.”

2-star | Mar 2026 | Translated from German **Open original review →**

“The server was overwhelmed and unfriendly.”

1-star | Jul 2026 | Translated from German **Open original review →**

“The service is excellent, attentive, and friendly.”

5-star | Jan 2025 | Translated from German **Open original review →**

Historical 24 Dec 2024-06 Jun 2026; recent 90d 06 Jun 2026-03 Sep 2026; latest 30d 05 Aug 2026-03 Sep 2026.

View all negative service cases →

CHAPTER 7

Kitchen / Food / Taste

WHAT IT PROVES

Food and Taste are broad strengths, but recent low-volume complaints include quality, staleness and dryness.

WHY IT MATTERS

Strong lifetime sentiment must not hide weak but actionable recent cases.

ACTION SUPPORTED

Check each complaint by dish, preparation, holding and future shift/time fields.

Open chapter →

Food and Taste remain strengths; recent complaints need pattern checks

CHAPTER 7 - KITCHEN / FOOD / TASTE

FOOD: HISTORICAL / RECENT / LATEST

Historical 148 mentions, 6 negative (Medium). Recent 90d 17 5 negative (Medium). Latest 30d 9 2 negative (Low).

TASTE: HISTORICAL / RECENT / LATEST

Historical 121 mentions, 2 negative (Low). Recent 90d 17 4 negative (Low). Latest 30d 8 1 negative (Low).

"... unfortunately, the food was terrible and very stale."

1-star | Aug 2026 | Translated from Arabic **Open original review →**

"... it was too dry and didn't taste good."

1-star | Jun 2026 | Translated from German **Open original review →**

"The food was simply excellent - freshly prepared, flavorful, and beautifully presented."

5-star | Aug 2026 | Translated from German **Open original review →**

Historical 24 Dec 2024-06 Jun 2026; recent 90d 06 Jun 2026-03 Sep 2026; latest 30d 05 Aug 2026-03 Sep 2026.

View all negative Food/Taste cases →

CHAPTER 8

Bar & Drinks

WHAT IT PROVES

The menu has 34 drink items, but only three receive observable review attention.

WHY IT MATTERS

Low attention is a visibility/context signal, not a sales conclusion.

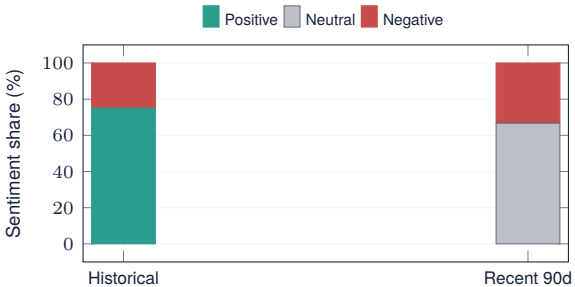

ACTION SUPPORTED

Audit recommendation, presentation and bundles; connect decisions to POS.

Open chapter →

The bar has menu presence but little observable review attention

CHAPTER 8 - BAR & DRINKS

ATTENTION BASELINE

Lifetime 7 mentions (3.18% written-review coverage). 2/34 drink items observed in reviews (5.88%). Latest 30d: 2 mentions; 1 negative, 1 neutral.

"... we received the wrong drink."

2-star | Aug 2026 | Translated from German **Open original review →**

Historical 24 Dec 2024-06 Jun 2026; recent 90d 06 Jun 2026-03 Sep 2026. Review attention is not sales.

View drink-related cases →

CHAPTER 9

Buffet

WHAT IT PROVES

Broadly positive overall, but subtopic evidence is sparse.

WHY IT MATTERS

The concept is operationally important, but review data alone cannot diagnose quality consistently.

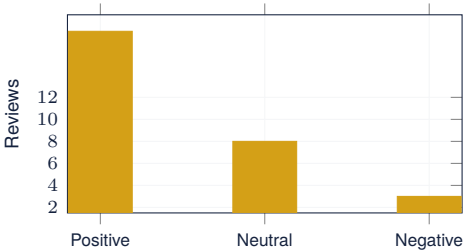

ACTION SUPPORTED

Collect dedicated feedback and monitor quality, value, replenishment and queue signals.

Open chapter →

Buffet is broadly positive overall, but subtopic evidence is sparse

CHAPTER 9 - BUFFET

Lifetime 24 Dec 2024-03 Sep 2026: 29 mentions, 13.2% written-review coverage.

Quality 1 | variety 3 | freshness 1 | value 3 | replenishment 0 | queue 0. Zero-support subtopics are none evidence, not low.

View negative/neutral buffet cases →

"My husband and I were here for the second time today and enjoyed the wonderful brunch buffet."

5-star | Sep 2025 | Translated from German **Open original review →**

"The food at the buffet is of poor quality, making the restaurant unnecessarily expensive."

3-star | Mar 2026 | Translated from German **Open original review →**

"The concept was changed and there was only a buffet."

3-star | Jan 2026 | Translated from German **Open original review →**

CHAPTER 10

Menu & Ordering

WHAT IT PROVES

Review silence covers 102 of 118 menu items; it cannot establish demand or profitability.

WHY IT MATTERS

Removing or redesigning from review attention alone would confuse memory with sales.

ACTION SUPPORTED

Collect clean POS economics, form hypotheses, then run controlled tests.

Open chapter →

Review silence is a menu signal, not a removal decision

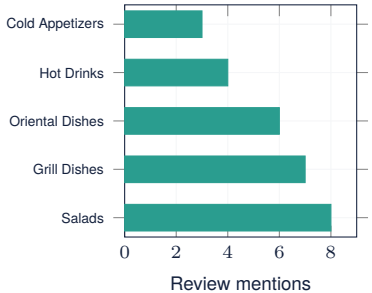

CHAPTER 10 - MENU & ORDERING

WHAT REVIEWS TELL US

118 menu items; 16 mentioned; 102 with no observable mentions; 13.56% attention coverage. Reviews show memory, praise, complaints and navigation friction.

WHAT THEY CANNOT TELL US

Orders, repeat purchase, revenue, margin, returns, time pattern or operational complexity.

DECISION MATRIX

High order / high attention
protect and highlight

High / low
improve storytelling

Low / high
investigate polarity

Low / low
simplify only after margin check

Review period 24 Dec 2024-03 Sep 2026. POS/order data is not available. Week 2 prepares data and hypotheses; it does not complete redesign.

View menu complaint cases →

View POS fields and matrix →

CHAPTER 11

Dishes Mentioned in Reviews

WHAT IT PROVES

Sixteen dishes/items have observable review mentions; only Mansaf and Tabbouleh meet the five-review rating threshold.

WHY IT MATTERS

A two-item comparison cannot support best/worst claims, and review mentions are not orders.

ACTION SUPPORTED

Use all item-level evidence as hypotheses and connect it to POS.

Open chapter →

Dish evidence identifies attention and cases, not best sellers

CHAPTER 11 - DISHES MENTIONED IN REVIEWS

QUALIFIED BY RATING THRESHOLD

Mansaf 6 mentions, whole-review avg. 5.0; Tabbouleh 5, avg. 4.0. Fewer than three dishes qualify, so no comparative highest/lowest ranking is shown.

NEGATIVE ITEM EVIDENCE

Mixed Grill: 4 mentions, 2 negative; whole-review avg. 2.5; Low evidence.

Review period 24 Dec 2024-03 Sep 2026. Whole-review rating is not a guaranteed dish-specific score.

View all 16 dishes/items →

CHAPTER 12

Management Observations

WHAT IT PROVES

Customer evidence, internal observations, data needs, experiments and recommendations are different sources.

WHY IT MATTERS

Blurring provenance can turn hypotheses into apparent facts.

ACTION SUPPORTED

Label every claim and approve experiments explicitly.

Open chapter →

Separate evidence, observations, experiments and decisions

CHAPTER 12 - MANAGEMENT OBSERVATIONS

CUSTOMER/DATA EVIDENCE

Drinks/bar has low observable review attention; menu/tablet confusion appears in customer evidence.

INTERNAL OBSERVATION

Static menu, manual favourites, no recurring offers/bundles, parking visibility and current welcome/guidance are business observations.

PROPOSED EXPERIMENT

Welcome gesture, weekly feature, bundle, drink feature and richer dish media are tests.

View provenance register →

DATA REQUIRED

POS orders, revenue, margin, returns and time patterns are required.

MANAGEMENT ACTION

Buffet needs dedicated feedback and quality monitoring.

MEASUREMENT PRINCIPLE

Lifetime rating moves slowly; weekly control should use rolling 30d/90d.

CHAPTER 13

Action Plan

WHAT IT PROVES

Immediate recovery work is distinct from evidence-dependent menu and operating changes.

WHY IT MATTERS

Premature redesign would outrun POS readiness and hide ownership.

ACTION SUPPORTED

Execute week 1 now; use week 2 for data/hypotheses; test and decide later.

Open chapter →

Separate immediate recovery from evidence-dependent change

CHAPTER 13 - ACTION PLAN

Immediate

- Assign response owner and log cases
- Reply to open recent reviews
- Check Service/Food cases
- Start rolling KPI dashboard
- Brief staff on menu/buffet/drinks guidance
- Assign competitor/market tasting visits

Open immediate checklist →

Evidence-dependent

- Week 2: export/clean POS data
- Define fields and redesign hypotheses
- Define favourite-selection method
- Choose first controlled tests
- Weeks 3-4: test, review, decide
- Repeat market scan and compare evidence

Open Week 2 plan →

View competitor/market assignment →

View test-and-decide plan →

CHAPTER 14

Delegation & Ownership

WHAT IT PROVES

Seven fragmented workstreams can be simplified into four accountable responsibility groups.

WHY IT MATTERS

Clear ownership reduces handoffs while preserving manager accountability.

ACTION SUPPORTED

Delegate deliverables and KPIs; review evidence, blockers and dates weekly.

Open chapter →

Four workstreams; the manager keeps accountability

CHAPTER 14 - DELEGATION & OWNERSHIP

1. Reputation & Data

Reviews, responses, cases, dashboard and evidence. Owner: Admin/marketing or manager.

2. Guest Experience

Welcome, menu guidance, waiting, communication and buffet service. Owner: Service lead.

3. Kitchen & Buffet Quality

Food cases, dish quality, freshness, consistency and buffet checks. Owner: Kitchen lead.

4. Menu, Bar & Offers

POS analysis, hypotheses, favourites, offers, drinks and media. Owner: Manager + lead.

Management implication: Delegate ownership, not accountability. The manager reviews result, evidence, blocker, next action and deadline weekly.

View responsibilities, KPIs and escalation →

CHAPTER 15

KPI Tracking

WHAT IT PROVES

Weekly control needs rolling review, follow-up, operational and experiment indicators.

WHY IT MATTERS

The lifetime Google rating moves too slowly to manage weekly execution.

ACTION SUPPORTED

Use the current 30d baseline and review rolling 30d/90d every week.

Open chapter →

Weekly KPI dashboard: four control blocks

CHAPTER 15 - KPI TRACKING

1. WEEKLY REVIEW KPIS

New reviews; new-review average; negative share; low-score cases. **Baseline:** 3.27/week, 3.93 average, 28.6% negative.

2. FOLLOW-UP KPIS

Owner response rate; low-score response; delay; open cases. **Baseline:** 0.0% recent response.

3. OPERATIONAL KPIS

Service negatives; Food/Taste negatives; menu complaints; Drinks attention; Buffet sentiment. Show count, percentage and evidence.

4. EXPERIMENT KPIS

Offer uptake; bundle uptake; welcome feedback; eligible orders; revenue/margin; POS/order impact. Currently unavailable until tests begin.

Lifetime Google rating moves slowly. Use rolling 30d for fast feedback and rolling 90d for stability; review the lifetime score monthly.

View KPI definitions →

CHAPTER 16

Evidence Appendix

WHAT IT PROVES

The management story is traceable to dated registers, charts, anonymous excerpts and public review links.

WHY IT MATTERS

Decision-makers can inspect detail without overloading the main narrative.

ACTION SUPPORTED

Open the relevant appendix, then return to the exact source slide.

Open chapter →

Evidence Appendix Roadmap - performance and cases

CHAPTER 16 - EVIDENCE APPENDIX

Appendix A - Latest 30 Days
Summary plus all 14 cases, topics, language, response and original links.

Appendix B - Previous 30 Days
All six comparison cases with the same fields.

Appendix C - Bad-Review Register
All 30 low-score cases with proposed owner, deadline, check and closure status.

Appendix D - Bad-Review Patterns

Areas, co-occurrences, recent shift and data gaps.

Appendix E - Service
All negative Service cases.

Appendix F - Food/Taste
All negative Food/Taste/quality cases.

Appendix G - Bar/Drinks
Negative and neutral drink cases.

Appendix H - Buffet

Negative and neutral buffet cases.

Appendix D1 - Bad-review patterns by operational area

EVIDENCE APPENDIX D1 - PATTERN ANALYSIS

Service 9 (30.0%, Medium); Food 10 (33.3%, Medium); Price/Value 5 (16.7%, Medium); Taste 6 (20.0%, Medium); Menu/Tablet 1; Drinks 1; Buffet 1.

Interpretation: Service is the clearest repeated operational area. Food and Price/Value are repeated but smaller. One-off topics remain investigation signals.

← Back to Bad-Review Patterns

Appendix D2 - Bad-review co-occurrence and recent shift

EVIDENCE APPENDIX D2 - CO-OCCURRENCE AND TIMING

REPEATED COMBINATIONS

Food + Food Quality	6 cases | 20.0%	REPEATED
Food + Taste	5 cases | 16.7%	REPEATED

All other pairings occur once. Co-occurrence is useful for investigation, not proof of causality. Day/time and shift data are not available.

RECENT 90D VS HISTORICAL

Food: 5 → 5 (+31.8 pp; recent evidence weighted by support)
Taste: 2 → 4 (+34.9 pp)
Service: 6 → 3 (4.8 pp)
Price/Value: 5 → 0 (-23.8 pp)

Period: recent 90d 06 Jun 2026 to 03 Sep 2026; historical 24 Dec 2024 to 06 Jun 2026.

Appendix K - Owner-response period evidence

EVIDENCE APPENDIX K - OWNER RESPONSE

Overall response: 10.74% (32 reviews). Latest 30d: 0.0%. Recent 90d: 0.0%. Low-score: 3.33%; 29/30 unanswered. Average delay among answered reviews: 10.0 days; median 5.3 days.

Action: acknowledge every review; give every low-score case an owner, response target, internal check and closure status.

← Back to Review Flow

Appendix L - Provenance and management observations

EVIDENCE APPENDIX L - PROVENANCE

CUSTOMER/DATA EVIDENCE

Drinks/bar has low observable review attention. Menu/tablet confusion appears in review evidence. Response and topic metrics are customer/data evidence.

INTERNAL OBSERVATION

Parking visibility, static menu, manual favourites, no weekly offers/bundles, and current welcome/menu guidance are management observations supplied by the business.

PROPOSED EXPERIMENT

Welcome gesture, featured item, bundle, drink feature and richer dish media are proposed tests.

← Back to Management Observations

DATA REQUIRED

POS orders, revenue, margin, returns, day/time and offer uptake are required before menu removal or redesign decisions.

MANAGEMENT ACTION

Buffet needs dedicated feedback and quality monitoring.

MEASUREMENT PRINCIPLE

Lifetime rating moves slowly; weekly control should use rolling 30d and 90d indicators.

Appendix M1 - Week 1 immediate action checklist

EVIDENCE APPENDIX M1 - IMMEDIATE ACTIONS

TODAY / NEXT 48 HOURS

- Assign response owner and backup
- Log all recent low-score cases
- Approve the response rule
- Reply individually to open recent reviews
- Brief Guest Experience and Kitchen leads
- Confirm profile and parking information

PLAN THIS WEEK

- Start rolling KPI dashboard
- Define POS export fields
- Assign competitor/market visits
- Select comparable dishes and venues
- Prepare one welcome, offer and bundle test
- Capture owners, dates and success measures

← Back to Action Plan

Open market scan assignment →

Appendix M2 - Week 2 data and hypothesis setup

EVIDENCE APPENDIX M2 - WEEK 2

POS/DATA WORK

- Export item-level POS/order data
- Clean item/category names
- Add orders, revenue, margin, returns and time
- Match review-attention names to POS items
- Document gaps and owners

PREPARE - DO NOT REDESIGN YET

- Draft menu-navigation hypotheses
- Define favourite-selection method
- Select first controlled tests
- Define offer/bundle measures
- Agree evidence threshold and decision date

Week 2 does not complete menu redesign or update favourites. Those decisions wait for clean POS economics plus review evidence.

← Back to Action Plan

Appendix M3 - Weeks 3-4: test, review, decide

EVIDENCE APPENDIX M3 - CONTROLLED TESTS

WEEK 3 - SMALL TESTS

- One featured food item
- One drink feature or bundle
- One welcome gesture
- Proactive menu/buffet/drink guidance
- Capture eligible orders, uptake, margin and feedback

WEEK 4 - REVIEW AND DECIDE

- Review rolling 30d/90d and open cases
- Compare uptake, margin and staff burden
- Stop, adjust or scale each test
- Schedule next buffet feedback cycle
- Update menu/favourites only when evidence is ready

← Back to Action Plan

Appendix M4 - Competitor and market tasting assignment

EVIDENCE APPENDIX M4 - MARKET SCAN

VISIT AND OBSERVE

- Taste comparable dishes
- Observe food and drink presentation
- Identify famous/popular dishes as presented
- Compare menu structure and buffet offer
- Observe service, welcome and guidance
- Note pricing, offers and bundles

BRING TO WEEKLY REVIEW

- Venue/date and assigned staff
- Comparable items and price notes
- Photos/notes where appropriate
- What appears transferable
- What should not be copied
- One test hypothesis with owner and metric

Immediate: schedule and assign the first visit. Long term: repeat a light market scan monthly or quarterly and review findings with POS/review evidence.

← Back to Action Plan

Appendix M5 - Four workstreams and escalation

EVIDENCE APPENDIX M5 - OWNERSHIP

Workstream	Owner	Responsibilities / deliverables	Weekly KPIs	Escalation question
Reputation & Data	Admin/marketing or manager	Reviews, responses, case log, dashboard, evidence tracking	Response, delay, open cases	Any case overdue or data missing?
Guest Experience	Service lead	Welcome, menu guidance, waiting, communication, buffet service	Service negatives, waiting, feedback	Repeating shift or journey failure?
Kitchen & Buffet Quality	Kitchen lead	Food cases, dish quality, freshness, consistency, buffet checks	Food/Taste negatives, buffet sentiment	Same dish/process/holding issue?
Menu, Bar & Offers	Manager + assigned owner	POS analysis, menu hypotheses, favourites method, offers, drinks, media	Uptake, margin, complaints, mentions	Enough evidence to change or scale?

Delegate ownership, not accountability. The manager reviews progress, evidence, blockers and next dates every week.

← Back to Delegation

Appendix M6 - Low-score response and closure process

EVIDENCE APPENDIX M6 - RESPONSE PROCESS

1. Log the review and anonymous case ID.
2. Assign workstream owner and 48-hour response target.
3. Acknowledge the experience without arguing.
4. Reference the specific issue accurately.
5. Run the internal operational check.
6. Record public-response date and internal action.
7. Close only when the check/action is documented.

Do not:
copy generic replies
reveal personal information
promise unverified fixes
debate publicly
mark closed without evidence

Day/time, shift and internal-resolution data are currently unavailable; capture them in the case log.

← Back to Review Flow ← Back to Operational Cases

Appendix M7 - POS fields and decision matrix

EVIDENCE APPENDIX M7 - POS / MENU DECISION SUPPORT

DATA REQUIRED

- Item and category
- Orders and repeat orders
- Revenue and contribution margin
- Discounts, cancellations and returns
- Day/time and recent trend
- Offer/bundle participation
- Review-attention match

High order / high attention: protect and highlight.

High order / low attention: sells but may not be memorable; improve storytelling.

Low order / high attention: niche or polarizing; investigate.

Low order / low attention: candidate for simplification only after margin and operational check.

← Back to Menu & Ordering

Appendix N - KPI definitions and review cadence

EVIDENCE APPENDIX N - KPI CONTROL

KPI	Definition	Cadence	Owner
New reviews / average	Count and mean rating in rolling 30d/90d	Weekly	Reputation & Data
Negative share / low-score	1-2 star share and count	Weekly	Manager
Owner / bad-review response	Share answered; low-score answered within target	Weekly	Response owner
Response delay / open cases	Days to public response; cases without closure	Weekly	Reputation & Data
Operational negatives	Service, Food/Taste, Menu, Drinks, Buffet signals	Weekly	Workstream leads
Experiment uptake	Eligible orders, uptake, revenue, margin, feedback	Weekly	Menu/Bar owner

Current 30d baseline: 3.27 reviews/week; 3.93 average; 28.6% negative; 0.0% owner response. Lifetime Google rating moves slowly; use rolling 30d for fast control and rolling 90d for stability.

← Back to KPI Tracking
