COMPETITIVE INTELLIGENCE

Al Assiel Competitive Intelligence

Observed review performance • menu structure • field-research agenda

- AL ASSIEL
- OLIVENZWEIG
- AL SAFA
- BEIT FAYROUZ

Common cutoff: 03 Sep 2026 | Recent 90 days: 06 Jun–03 Sep 2026

What is compared—and what is not?

One cutoff, four formal restaurants, and an observed-evidence standard.

Formal set	Al Assiel · Olivenzweig · Al Safa · Beit Fayrouz
Common cutoff	03 Sep 2026; post-cutoff competitor reviews excluded from formal comparisons
Core window	Recent 90 days: 06 Jun–03 Sep 2026
Evidence rule	Counts, shares, sample sizes and low / medium / high evidence shown together
Interpretation	Observed comparison—not proof that one restaurant is universally better
Excluded	Aleppo Rose remains outside the formal benchmark

Source details →

View evidence →

The recent market signal is uneven—not a single ranking

During the common recent 90-day period, Al Assiel has the weakest rating and the highest low-score share in the formal set.

Al Assiel	Olivenzweig	Al Safa	Beit Fayrouz
3.68 / 32.1%	4.35 / 13.5%	4.30 / 12.8%	4.86 / 0.0%
rating / low-score share · n=28	rating / low-score share · n=52	rating / low-score share · n=78	n=14 · medium evidence

Management implication: treat Beit Fayrouz's high observed rating cautiously because its recent sample is smaller. Al Assiel's 9 low-score reviews in 90 days are a repeated signal, not a one-off.

The market's owner-response behavior is also weak: all four recorded 0% responses in the common recent-90-day window.

View evidence →

Where does the observed evidence point to a leader?

Only qualified samples are labelled; ties and insufficient evidence remain explicit.

Observed measure	Qualified leader	Value	Evidence
Recent rating	Beit Fayrouz	4.86	n=14
Recent review volume	Al Safa	78	90-day reviews
Lowest low-score share	Beit Fayrouz	0.0%	n=14
Food positive sentiment	Olivenzweig	87.0%	mentions=23
Service positive sentiment	Al Safa	78.6%	mentions=28
Owner response rate	—	No unique leader	0% for all four in recent 90d

View evidence →

Recent 90-day benchmark

06 Jun–03 Sep 2026 · common boundaries for every restaurant

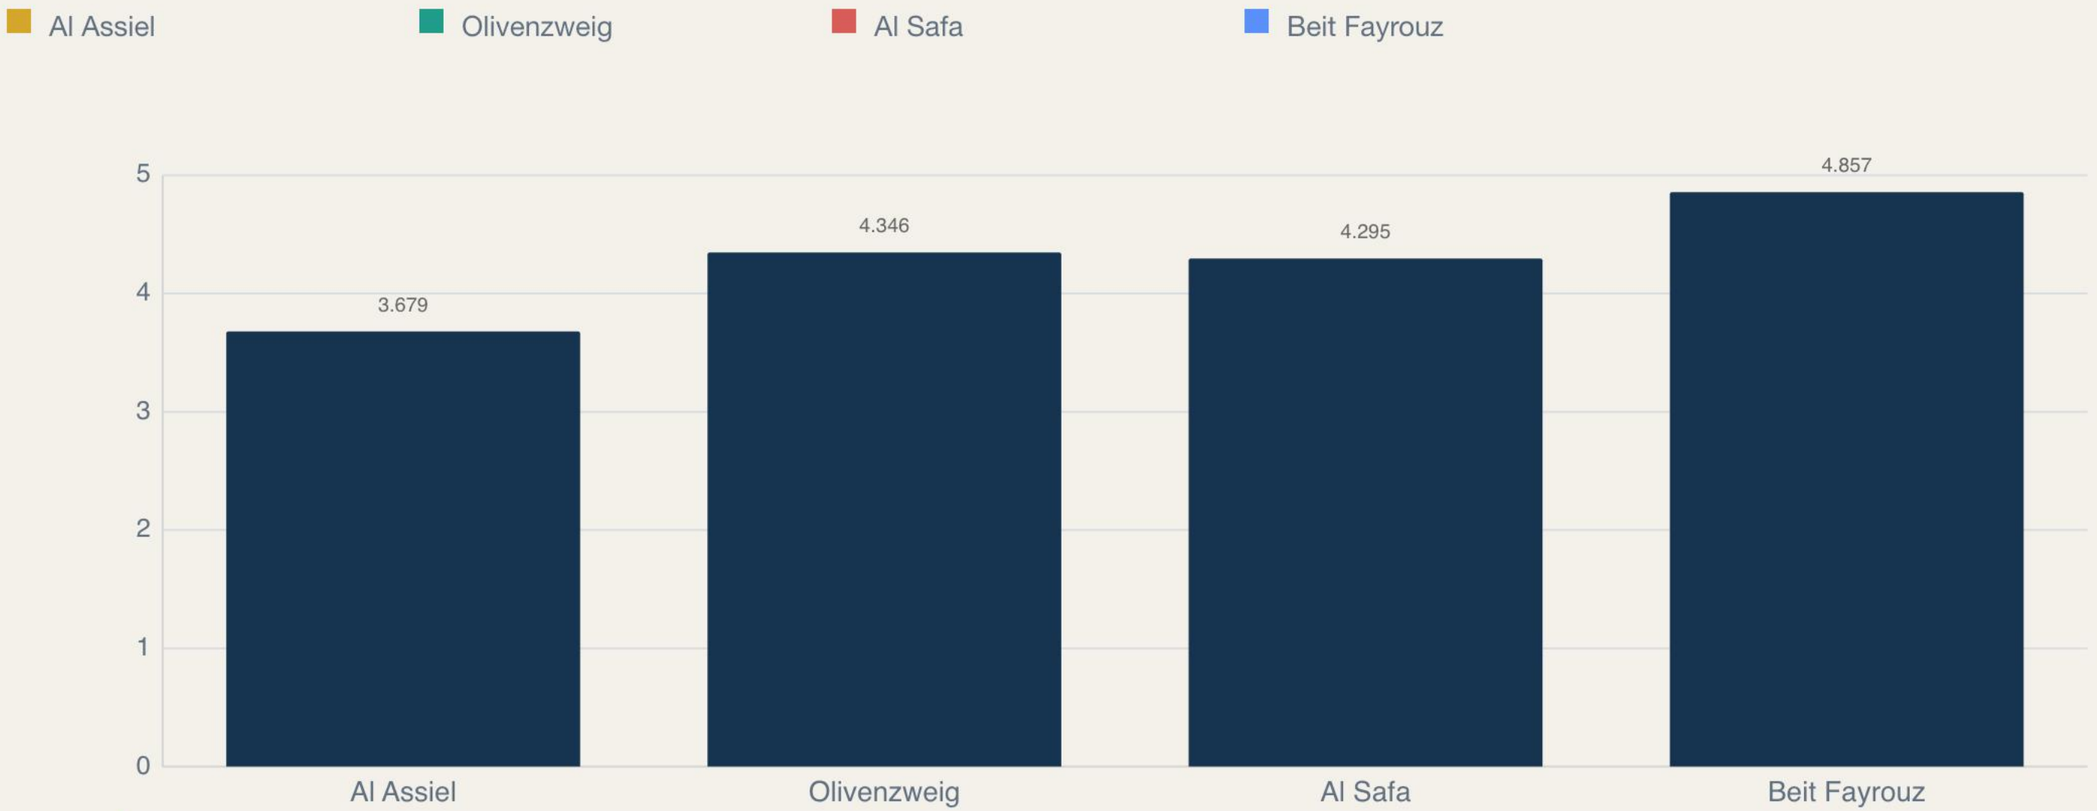

Restaurant	n	/ week	Rating	5-star	1–2 star	Written	Response	Evidence
Al Assiel	28	2.2	3.68	57.1%	32.1%	21	0.0%	high
Olivenzweig	52	4.0	4.35	75.0%	13.5%	33	0.0%	high
Al Safa	78	6.1	4.29	69.2%	12.8%	45	0.0%	high
Beit Fayrouz	14	1.1	4.86	92.9%	0.0%	6	0.0%	medium

Read the rating together with n and the low-score share. Beit Fayrouz: n=14 (medium); the other three recent samples are high evidence.

View evidence →

Observed rating: Al Assiel trails the recent field

Average Google review rating · 06 Jun–03 Sep 2026

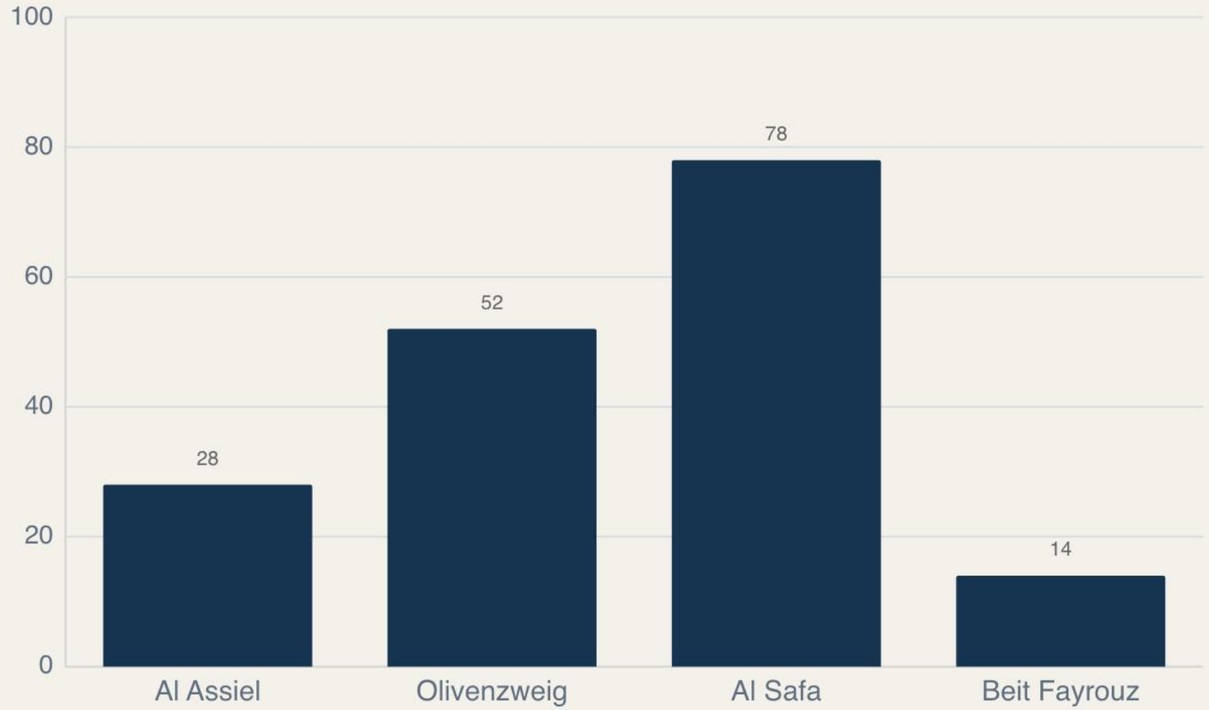

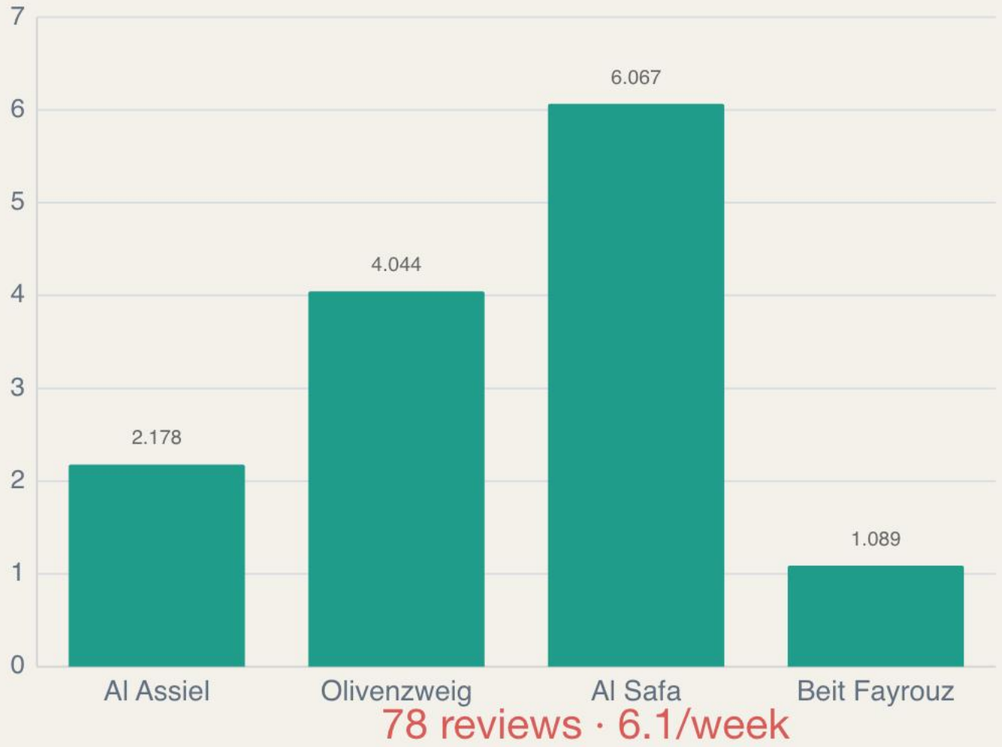

Al Assiel: 3.68 from 28 reviews. Beit Fayrouz’s 4.86 is based on only 14 reviews and needs caution.

View evidence →

Al Safa has the strongest recent review cadence

Review volume and reviews per week · 06 Jun–03 Sep 2026

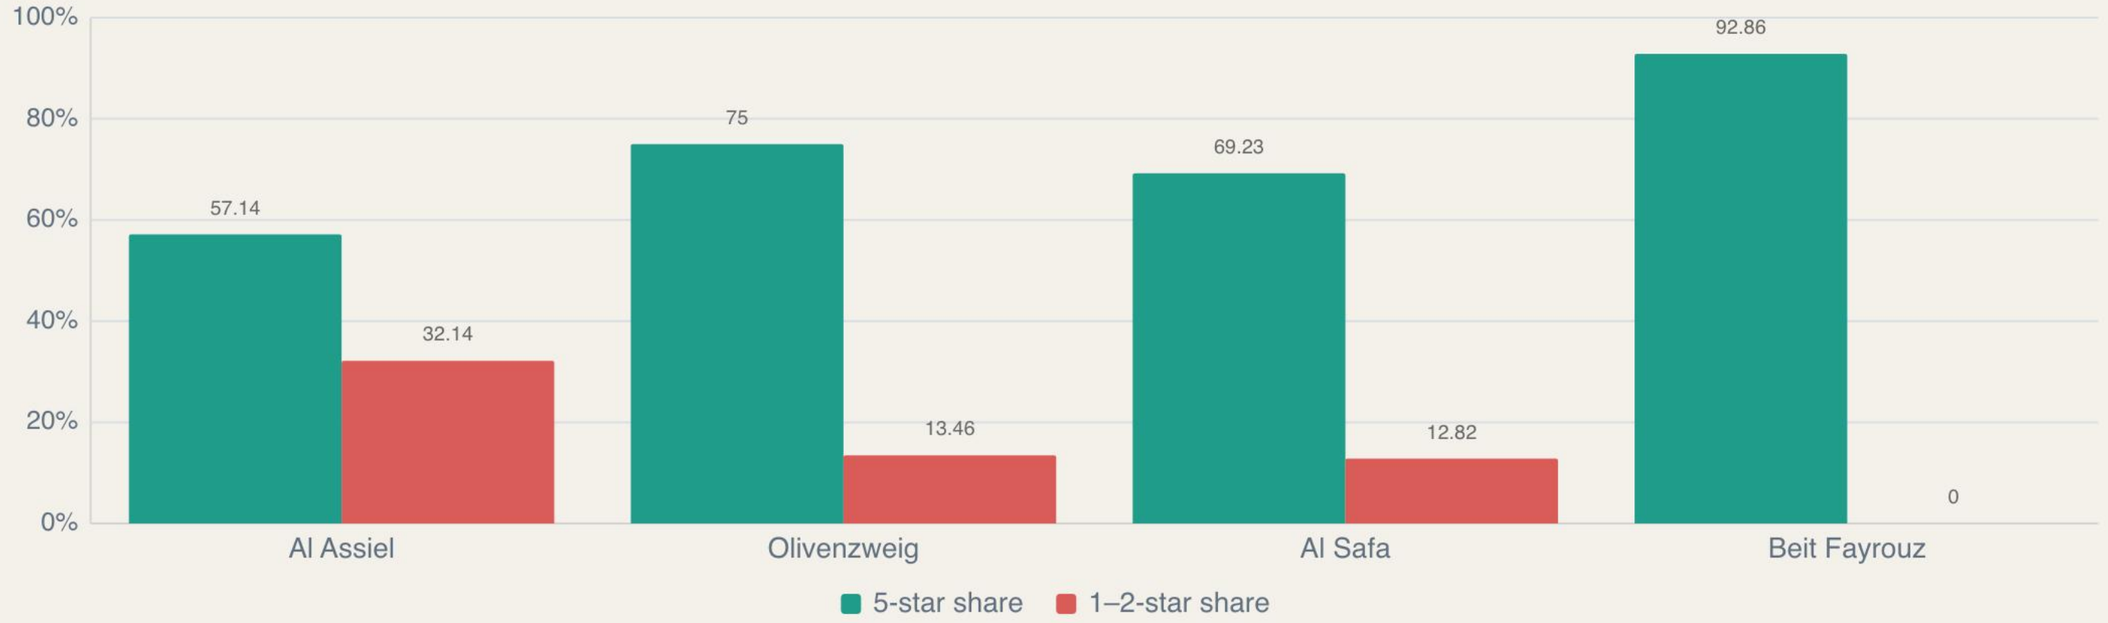

View evidence →

The risk is concentrated in Al Assiel’s low-score share

5-star and 1–2-star shares · counts are shown in the labels below

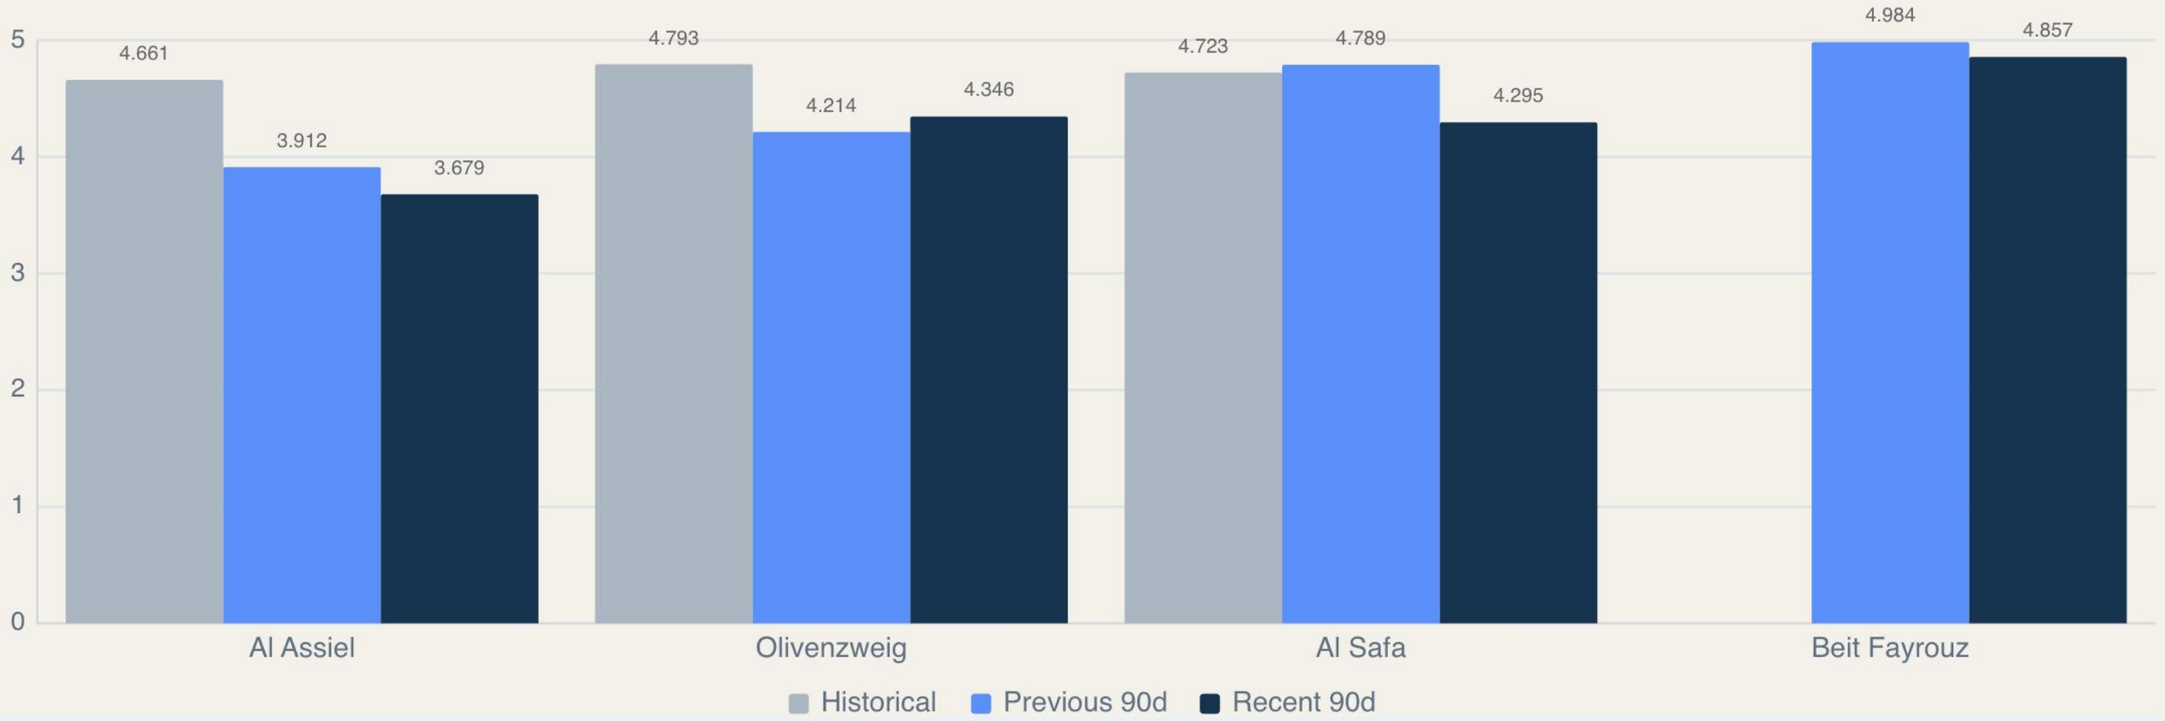

Al Assiel: 16 five-star / 9 low-score • Olivenzweig: 39 five-star / 7 low-score • Al Safa: 54 five-star / 10 low-score • Beit Fayrouz: 13 five-star / 0 low-score

View evidence →

Recent ratings diverge from prior baselines

Recent 90-day rating compared with previous 90 days and historical reviews through 07 Mar 2026

Al Assiel: 3.91 → 3.68. Al Safa: 4.79 → 4.30. Olivenzweig improved to 4.35. Beit Fayrouz has no historical baseline.

View evidence →

Latest 30 days: Al Assiel improves slightly, but remains exposed

05 Aug–03 Sep 2026 compared with 06 Jul–04 Aug 2026

Restaurant	n	Rating	Δ prior 30d	5-star	1–2 star	Response	Evidence
Al Assiel	14	3.93	+0.26	57.1%	28.6% (4)	0.0%	medium
Olivenzweig	15	4.93	+0.69	93.3%	0.0% (0)	0.0%	high
Al Safa	27	4.22	+0.04	70.4%	14.8% (4)	0.0%	high
Beit Fayrouz	4	5.00	+0.25	100.0%	0.0% (0)	0.0%	low

Beit Fayrouz latest 30d: n=4, low evidence. Do not treat 5.00 as a strong comparative conclusion.

View evidence →

Latest 30-day topics: the written sample is thin

Positive / negative counts for Food, Service, Taste and Price & Value; interpret counts before percentages

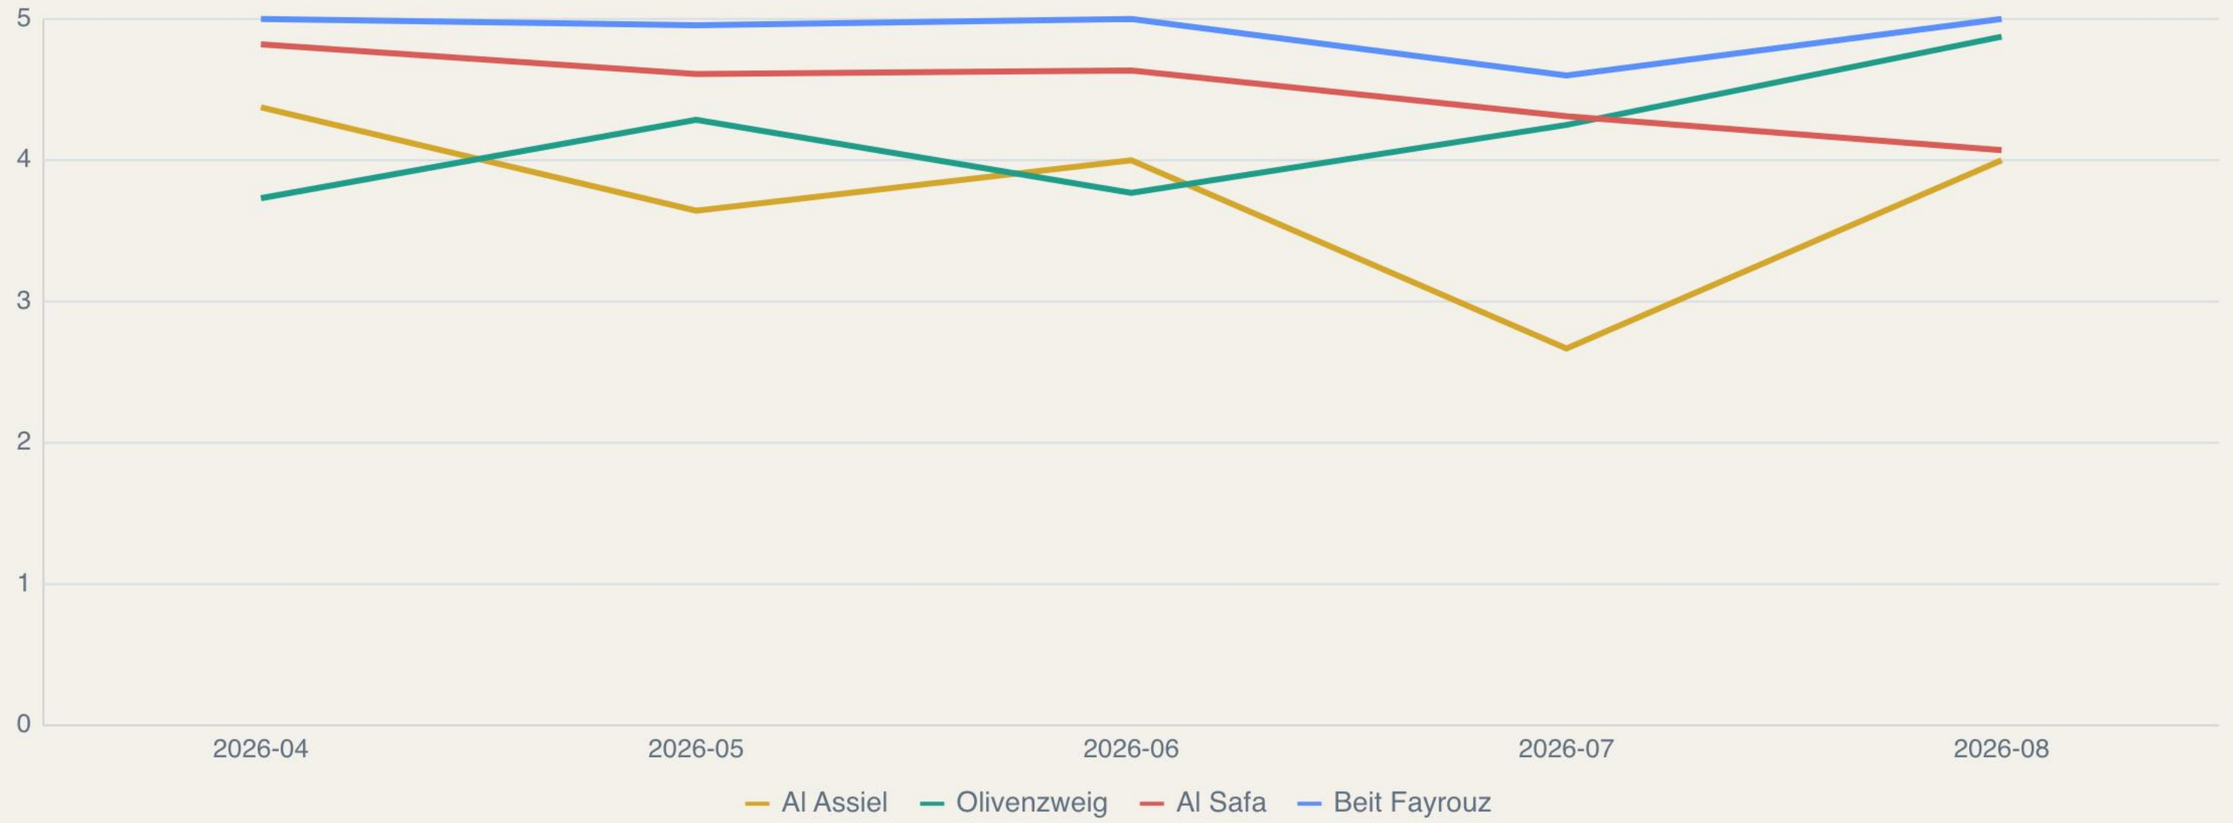

Restaurant	Topic	Mentions	Positive	Negative	Evidence
Al Assiel	Food	9	6	2	medium
Al Assiel	Service	10	7	1	medium
Al Safa	Food	10	6	1	medium
Al Assiel	Taste	8	7	1	medium
Olivenzweig	Service	4	1	1	low
Al Safa	Service	9	7	0	medium
Olivenzweig	Food	7	7	0	medium
Olivenzweig	Taste	7	6	0	medium

Beit Fayrouz: 4 reviews / 2 written reviews in the common 30-day window; topic evidence is too small for this table.

View evidence →

Monthly rating trend

Apr–Aug 2026 complete months; the partial September rating is excluded because one restaurant has no pre-cutoff reviews

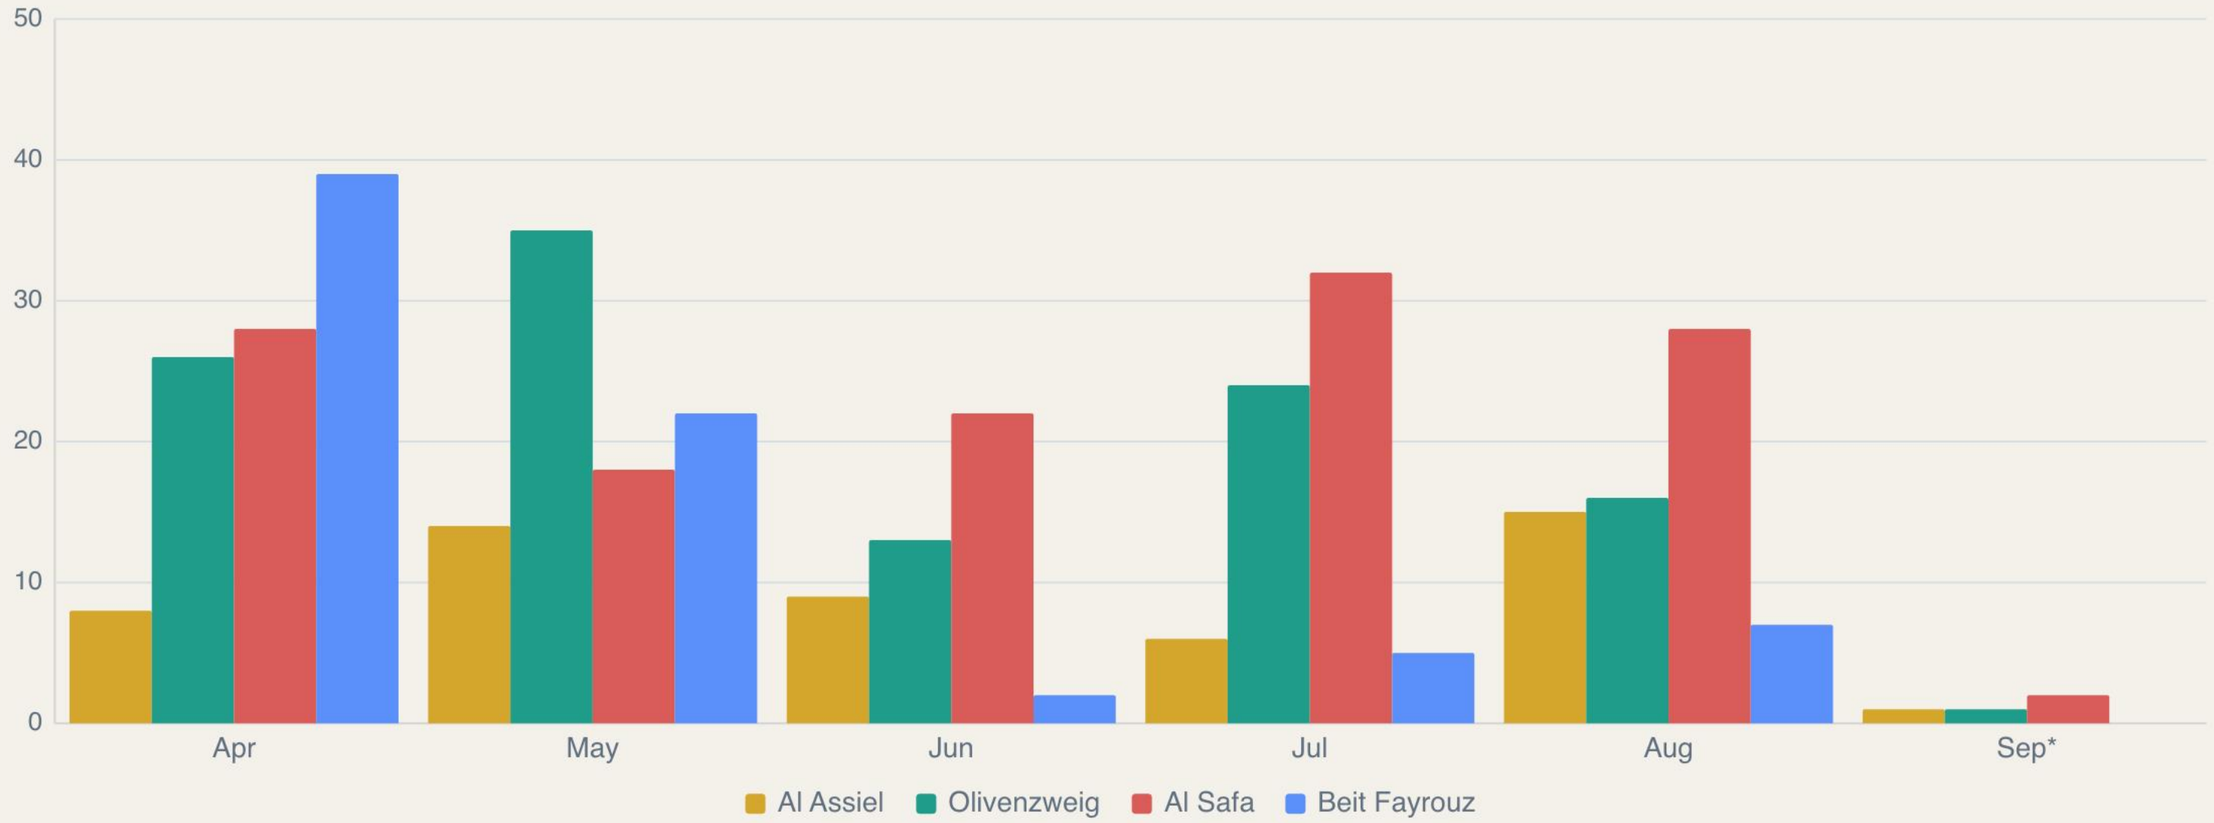

September partial-month evidence remains in Appendix E; no missing rating is plotted as zero.

View evidence →

Monthly review volume shows very different market visibility

Apr–03 Sep 2026 · September partial

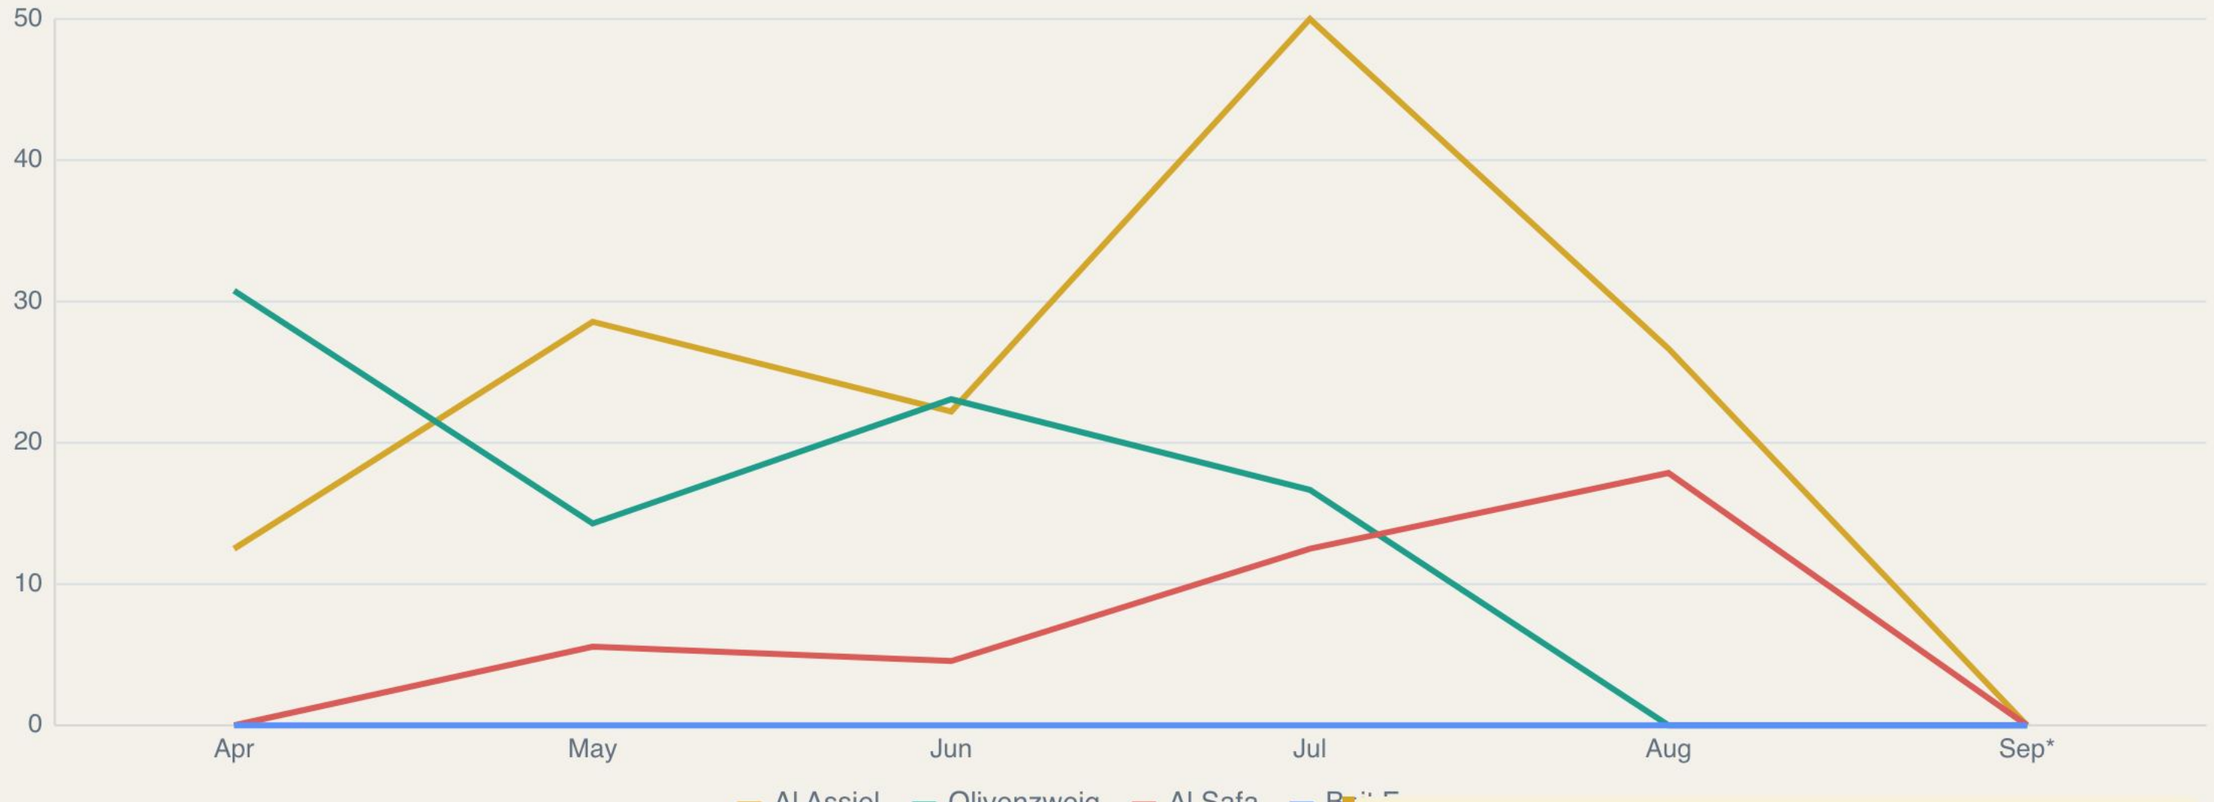

* September through 03 Sep. Volume is attention, not customer satisfaction.

View evidence →

Monthly low-score share isolates recent risk

1–2-star share by month · Apr–03 Sep 2026

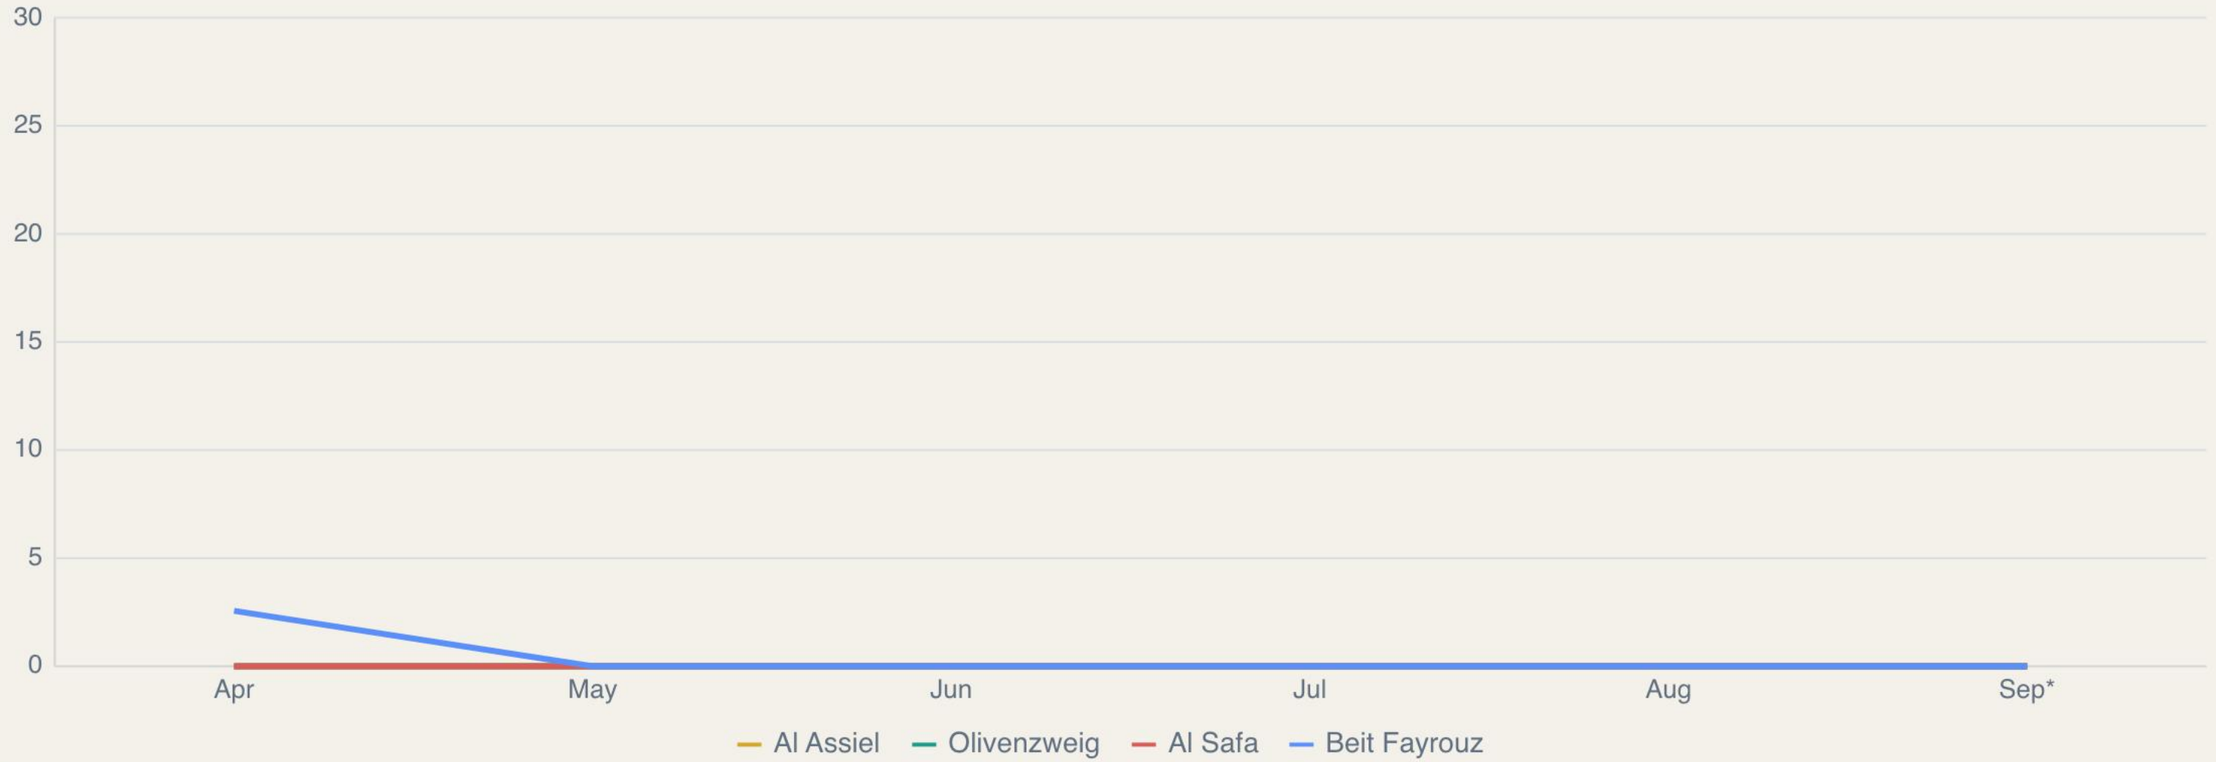

September is partial; use the 90-day view.

View evidence →

Owner-response activity disappears in the recent window

Monthly owner-response rate · Apr–03 Sep 2026

All four: 0 owner responses in the common recent 90-day period. The weakness is market-wide in this dataset; it still leaves Al Assiel's 9 recent low-score reviews unanswered.

View evidence →

Is Al Assiel uniquely weak at response management?

No—the recent weakness is shared, but historical behavior differs.

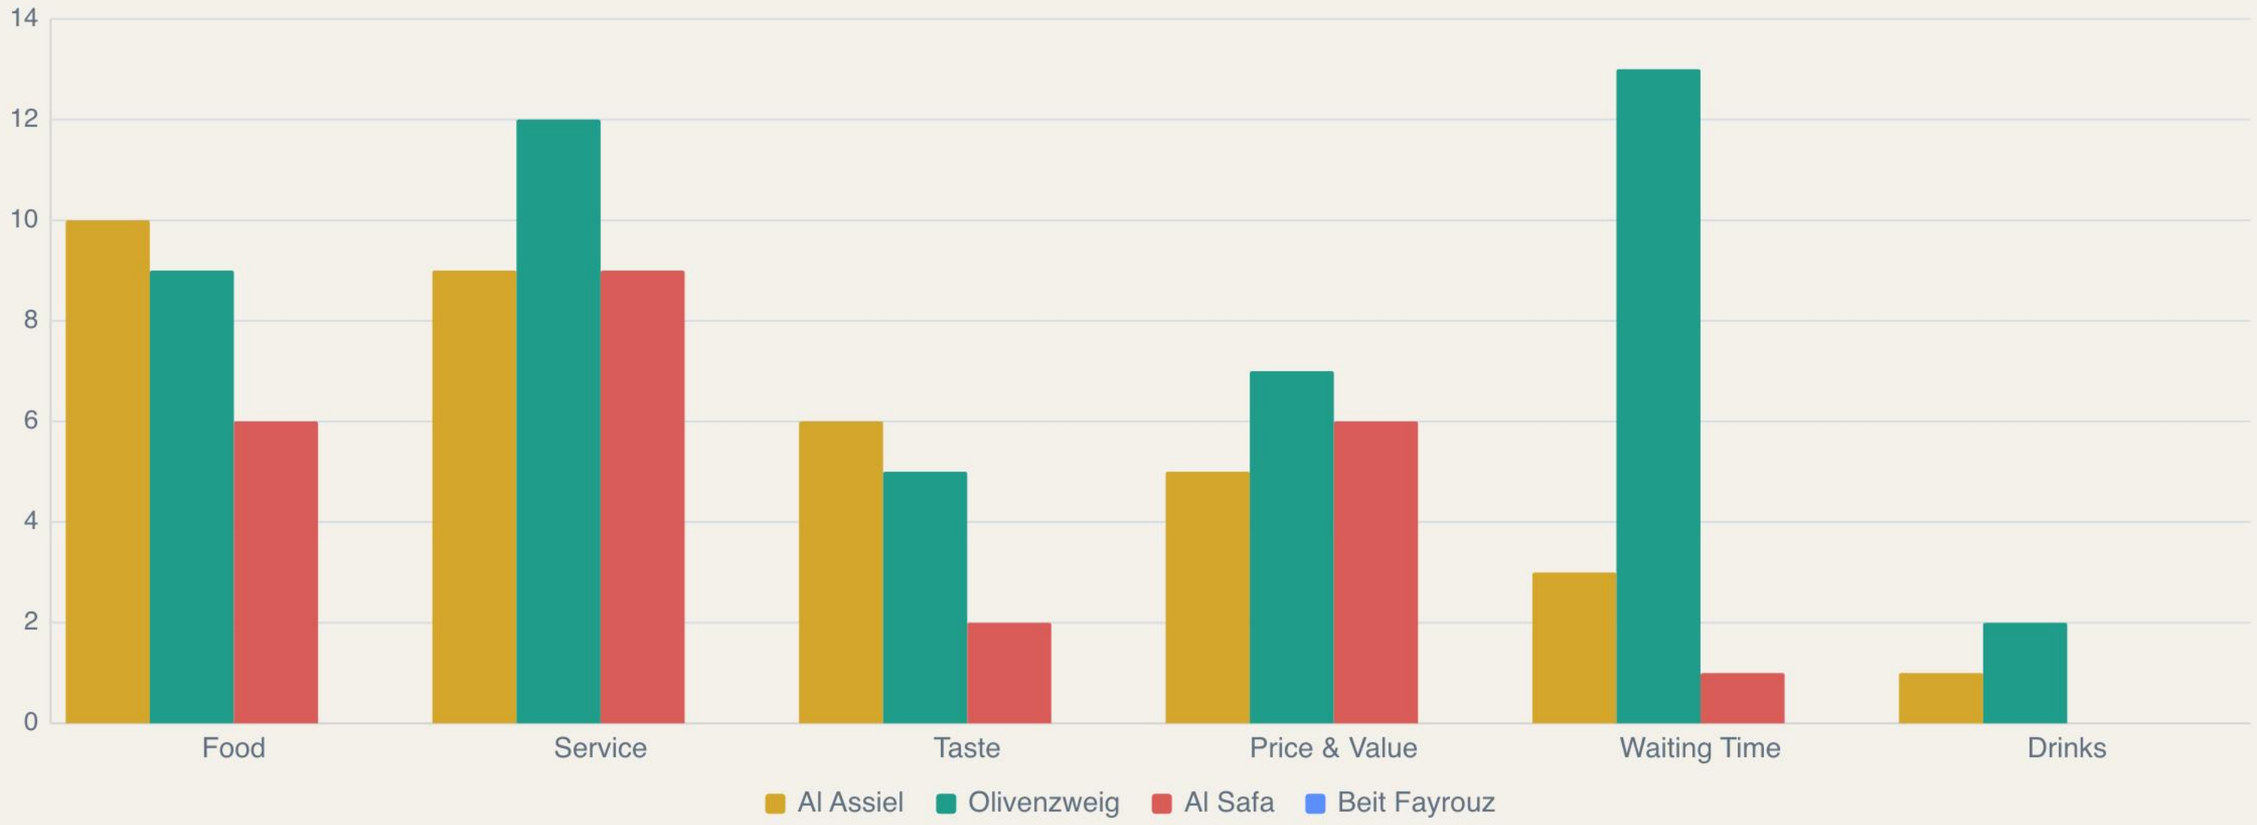

Restaurant	Recent 90d	All low-score	Unanswered	Overall rate	Median delay
Al Assiel	0/28 · 0.0%	1/30 · 3.3%	29	10.7%	5.3d
Olivenzweig	0/52 · 0.0%	3/39 · 7.7%	36	18.3%	11.0d
Al Safa	0/78 · 0.0%	4/35 · 11.4%	31	0.9%	4.5d
Beit Fayrouz	0/14 · 0.0%	0/0 · —	0	1.2%	0.1d

Actionable gap: respond to low-score reviews consistently. This is reputation hygiene, not a claim that replies change ratings.

View evidence →

What causes bad reviews?

Negative-topic counts across all written 1–2-star reviews through 03 Sep 2026

Counts—not percentages—are plotted. Denominators: Al Assiel 24, Olivenzweig 27, Al Safa 26, Beit Fayrouz 0 written low-score reviews.

View evidence →

Al Assiel: bad-review pattern

20 one-star · 10 two-star · 24 written · response 3.3%

Negative topic	Reviews	Share of written	Evidence
Food	10	41.7%	medium
Service	9	37.5%	medium
Food Quality	6	25.0%	medium
Taste	6	25.0%	medium
Price & Value	5	20.8%	medium
Freshness	3	12.5%	low

Repeated concentrations: Food 10/24, Service 9/24, Food Quality 6/24 and Taste 6/24. Eight written low-score cases mention a detected dish; 1 of 30 low-score reviews received an owner response.

Review cases →

Olivenzweig: bad-review pattern

26 one-star · 13 two-star · 27 written · response 7.7%

Negative topic	Reviews	Share of written	Evidence
Waiting Time	13	48.1%	medium
Service	12	44.4%	medium
Food	9	33.3%	medium
Price & Value	7	25.9%	medium
Taste	5	18.5%	medium
Staff Attentiveness	4	14.8%	low

The clearest concentration is Waiting Time: 13/27 written low-score reviews, alongside Service 12/27. Food appears in 9/27; dish involvement is lower at 3/27.

Review cases →

Al Safa: bad-review pattern

28 one-star · 7 two-star · 26 written · response 11.4%

Negative topic	Reviews	Share of written	Evidence
Service	9	34.6%	medium
Food	6	23.1%	medium
Food Quality	6	23.1%	medium
Price & Value	6	23.1%	medium
Staff Friendliness	6	23.1%	medium
Meat Quality	5	19.2%	medium

Service leads at 9/26; Food, Food Quality, Price & Value and Staff Friendliness each appear negatively in 6/26. Card-payment complaints are captured in 3 cases.

Review cases →

Beit Fayrouz has no written 1–2-star evidence

Zero observed low-score reviews through the common cutoff is favorable—but not proof of zero operational problems.

1–2-star reviews

0

through 03 Sep 2026

Recent 90d sample

14

medium evidence

Written recent reviews

6

topic evidence remains limited

Management reading: retain the favorable observed signal, but validate through structured visits and a larger future sample before treating it as a stable benchmark.

View evidence →

Common market problems vs restaurant-specific concentrations

Topic presence inside a written low-score review is not automatically negative sentiment.

COMMON MARKET ISSUES

- Food: recurs across restaurants
- Service: recurs across restaurants
- Taste: recurs across restaurants
- Price & Value: recurs across restaurants

TOPIC PRESENCE | NEGATIVE COUNT

- Al Assiel — Taste
10 mentions | 6 negative

- Olivenzweig — Waiting Time
13 mentions | 13 negative

- Al Safa — Meat Quality
7 mentions | 5 negative

- Al Safa — Staff Friendliness
6 mentions | 6 negative

View evidence →

Service sentiment: Al Safa has the strongest observed positive share

Recent 90 days · Service topic only; counts and evidence remain visible

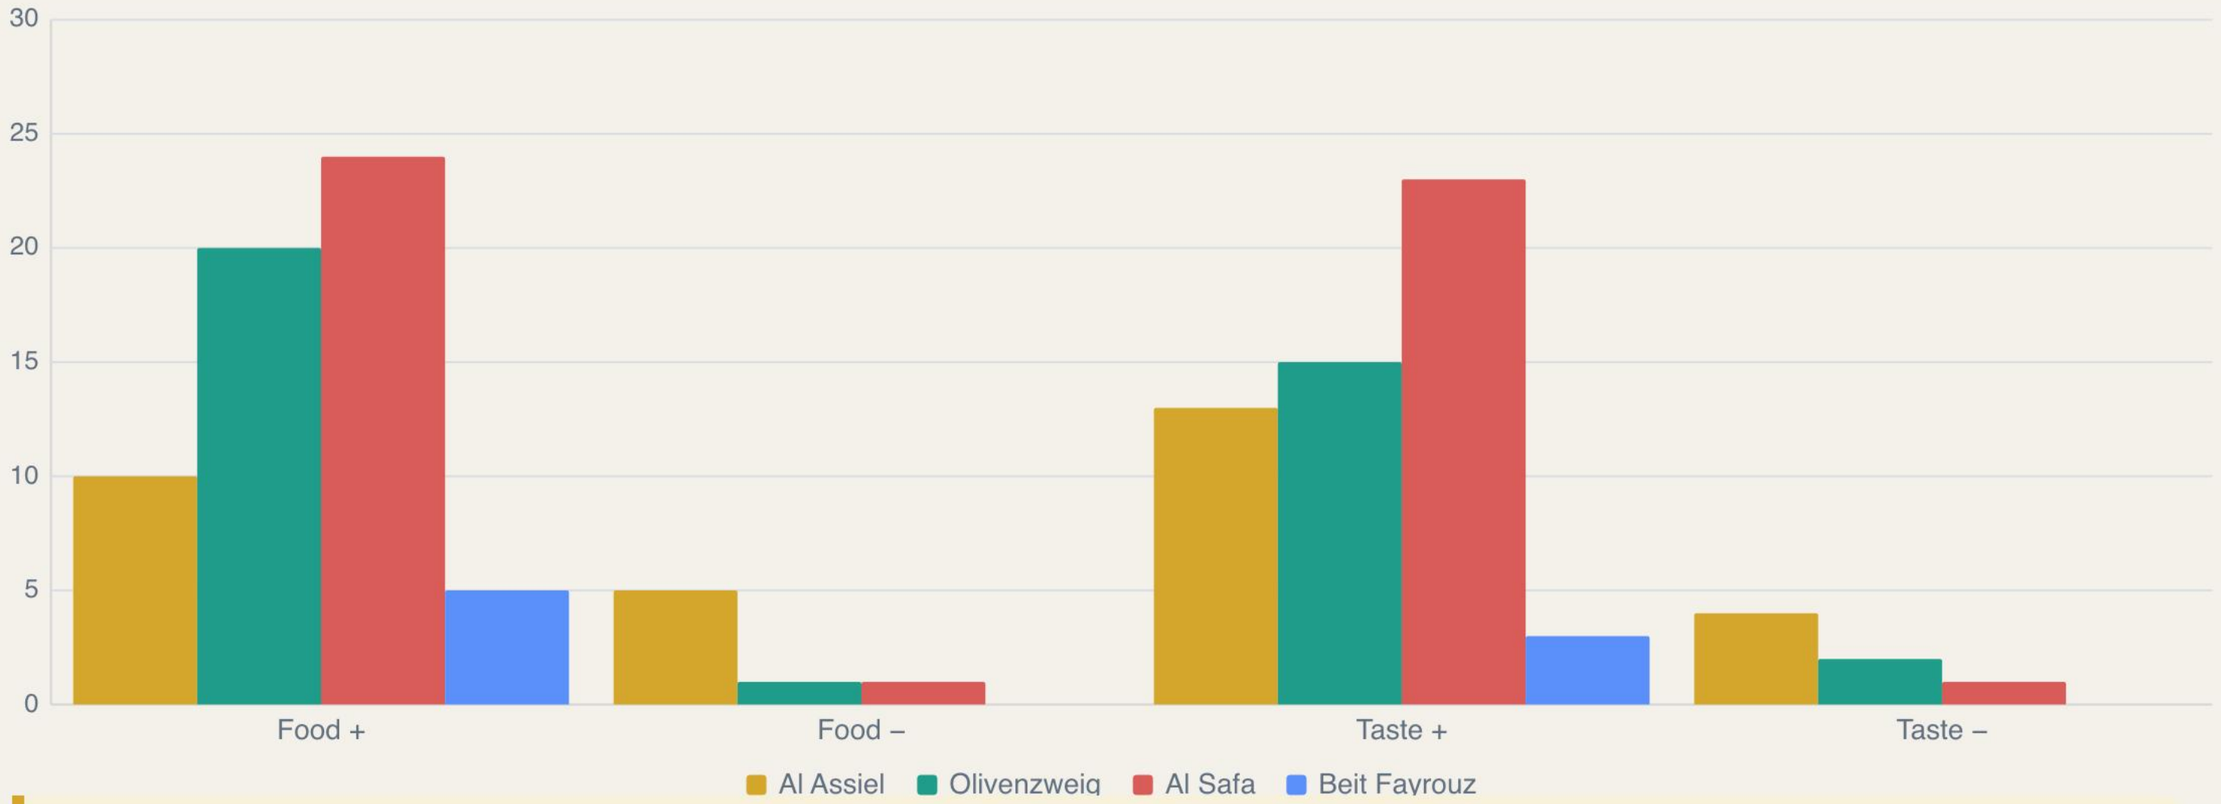

Restaurant	Mentions	Positive	Negative	Neutral	Evidence
Al Assiel	17	12 · 70.6%	3 · 17.6%	2	high
Olivenzweig	18	13 · 72.2%	2 · 11.1%	3	high
Al Safa	28	22 · 78.6%	1 · 3.6%	5	high
Beit Fayrouz	4	4 · 100.0%	0 · 0.0%	0	low

Observed service-positive leader: Al Safa, 22/28 positive (78.6%, high topic evidence). Al Assiel: 12/17 positive and 3/17 negative.

View evidence →

Food & Taste: Al Assiel carries the largest negative counts

Recent 90 days · topic-local sentiment; rating is not used as fallback

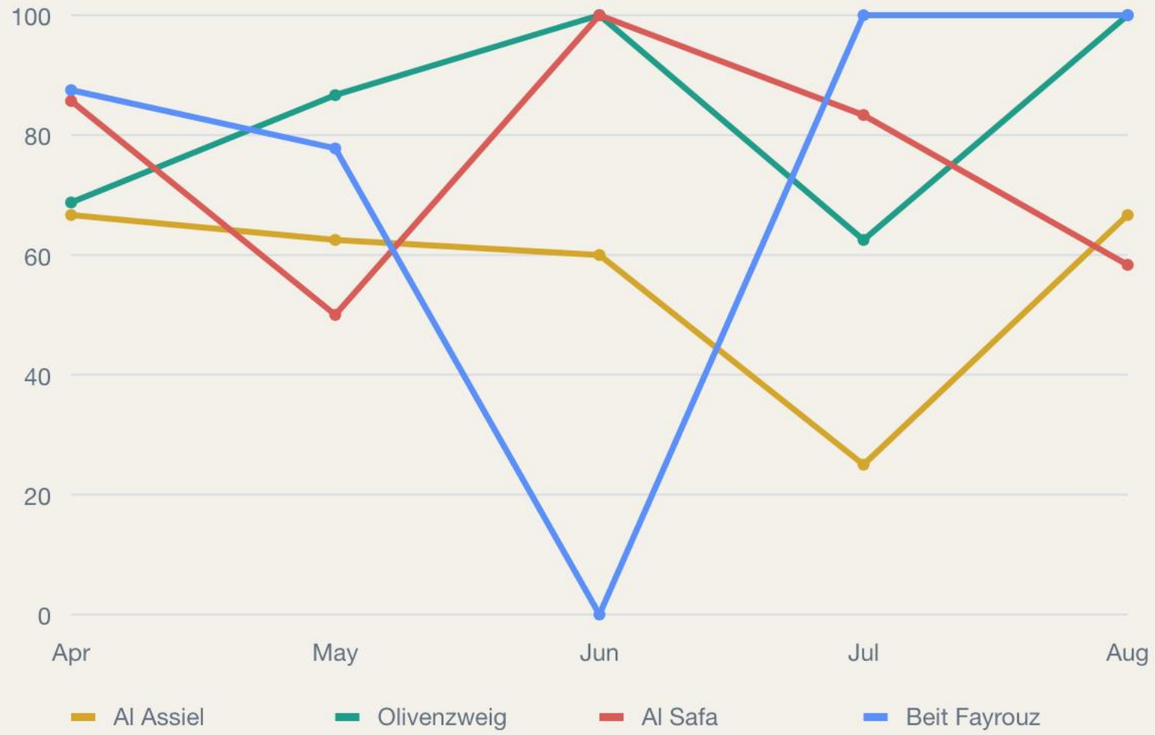

Al Assiel: Food 10 positive / 5 negative; Taste 13 positive / 4 negative, each from 17 mentions. Negative evidence is medium for Food and low for Taste.

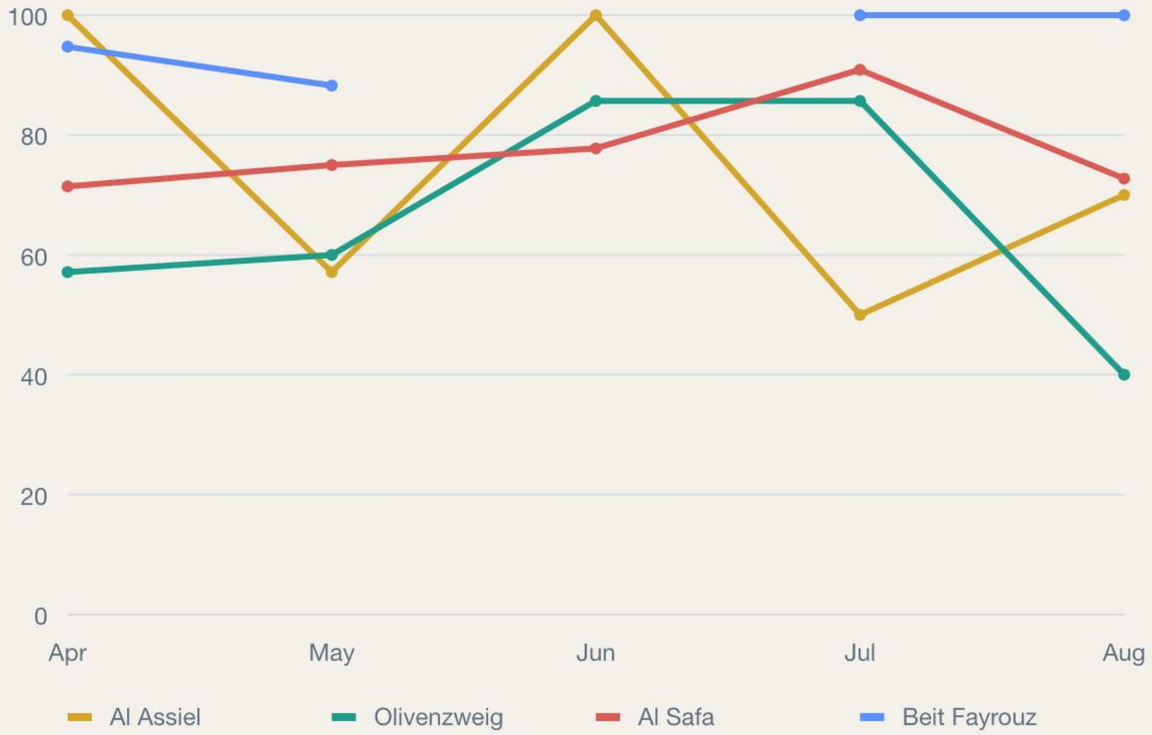

View evidence →

Food and Service sentiment over complete months

Positive share · Apr–Aug 2026 · gaps mean no topic evidence; September is partial and excluded

Food positive share

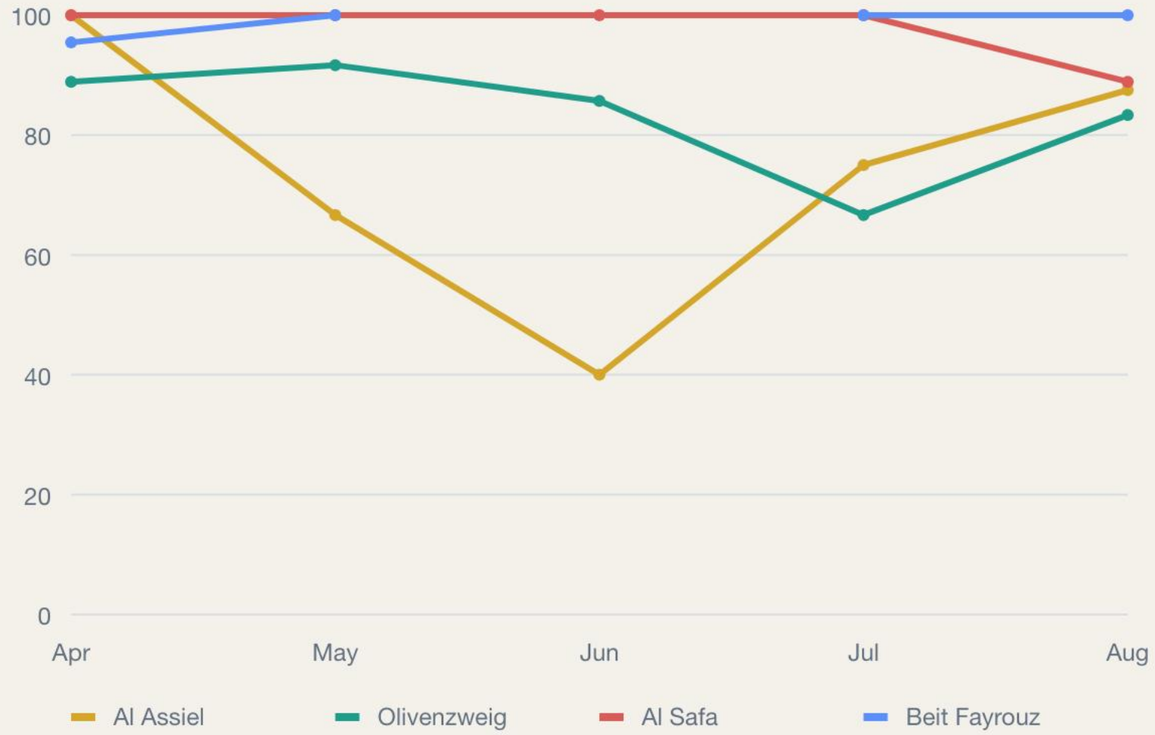

Service positive share

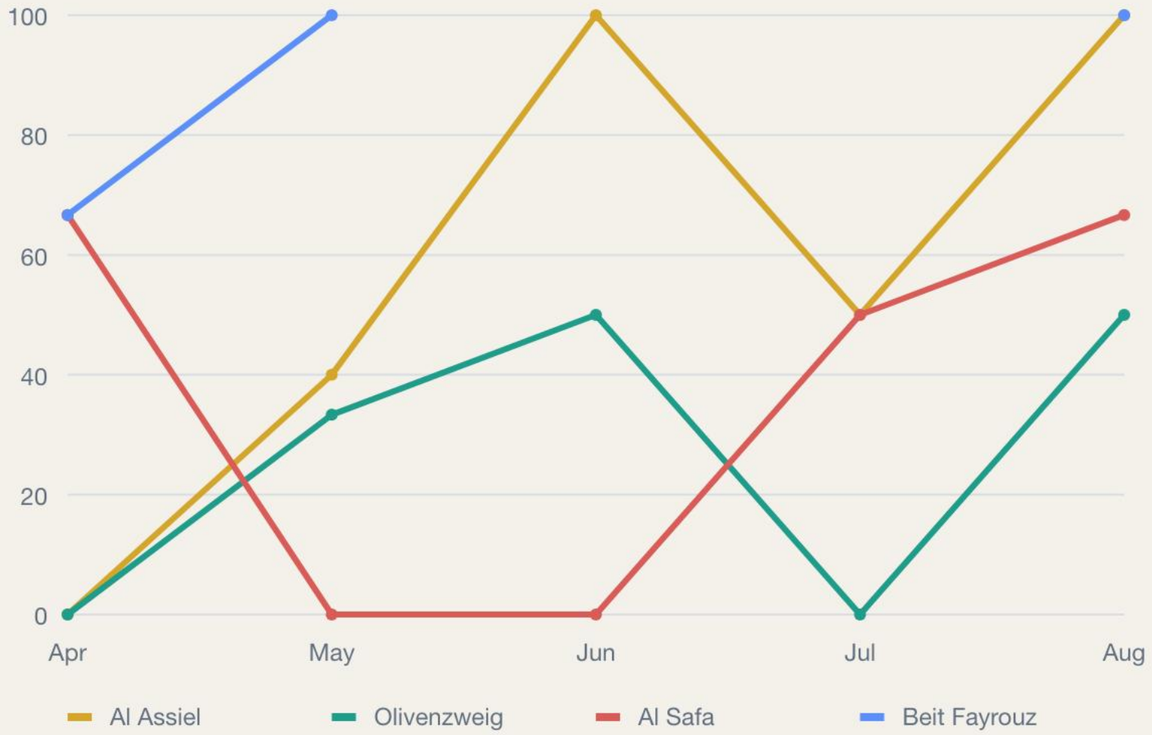

View evidence →

Taste and Value trends require count discipline

Positive share · Apr–Aug 2026 complete months; gaps mean no topic evidence

Taste positive share

Price & Value positive share

View evidence →

Value sentiment and menu price are different signals

Recent 90-day review sentiment on the left; selected comparable prices on the right

Restaurant	n	+	–	Evidence
Al Assiel	3	2	0	low
Olivenzweig	6	2	3	medium
Al Safa	8	4	3	medium
Beit Fayrouz	1	1	0	low

Item	Restaurant	Price	Match
Hummus	Al Assiel	€7.90	high
Hummus	Olivenzweig	€7.90	high
Hummus	Al Safa	€4.00	high
Hummus	Beit Fayrouz	€7.90	high
Tabbouleh	Al Assiel	€8.00	high
Tabbouleh	Olivenzweig	€9.50	high
Tabbouleh	Al Safa	€4.00	high

> Lower price is not automatically better value.

Price details →

Kitchen vs bar: Olivenzweig has the broadest observed drink program

Menu size and review attention are separate; neither implies sales

Restaurant	Food menu	Drinks menu	Food attention	Drink attention	Mocktails
Al Assiel	84	34	17 · 81.0%	3 · 14.3%	0
Olivenzweig	80	48	23 · 69.7%	1 · 3.0%	7
Al Safa	43	3	31 · 68.9%	0 · 0.0%	0
Beit Fayrouz	32	2	6 · 100.0%	0 · 0.0%	0

Corrected Al Assiel Drinks / Bar count: 34 items. Olivenzweig: 48 observed drink items. Review attention must not be read as demand or sales.

View evidence →

Concept comparison: buffet is not the same as brunch

Different concepts are kept distinct; unknown remains unknown.

Restaurant	Concept	Menu evidence	Observed reading	Evidence
Al Assiel	Buffet	Observed concept; not a menu group total	Broadly positive overall; subtopic evidence sparse	mixed by subtopic
Olivenzweig	Weekend Brunch	26 observed menu items	Separate brunch offer	menu high; review signal limited
Al Safa	No confirmed equivalent	Unknown	Not forced into comparison	none
Beit Fayrouz	Breakfast / sharing	4 breakfast; 3 overlapping sharing	Not labelled brunch	menu observed

> Al Assiel buffet wording: “Broadly positive overall, but subtopic evidence is sparse.”

View evidence →

Menu structures differ materially

Observed menu snapshots; overlapping attribute groups are marked and must not be summed

Normalized group	Al Assiel	Olivenzweig	Al Safa	Beit Fayrouz
Starters	17	26	9	8
Grill / Meat Mains	10	16	13	8
Other Main Dishes	22	0	13	0
Breakfast	15	0	0	4
Brunch	0	26	0	0
Desserts	8	2	2	0
Drinks / Bar	34	48	3	2
Sides	0	5	0	0
Kids	0	1	0	0

Olivenzweig: Sides 5, Kids 1—not Other Main Dishes. Beit Fayrouz's 8 source "Grill & Main Dishes" items are counted once under Grill / Meat Mains.

View evidence →

Dish signals are customer attention—not sales

Mentions, positive share and negative count remain visible

Restaurant	Dish	Mentions	Positive	Negative	Evidence
Al Assiel	Jordanisches Mansaf	6	2 · 33.3%	0	medium
Al Assiel	Tabbouleh	5	3 · 60.0%	0	medium
Olivenzweig	Schwarztee	15	9 · 60.0%	2	high
Olivenzweig	Hummus	10	4 · 40.0%	0	medium
Al Safa	Baklava	51	16 · 31.4%	0	high
Al Safa	Gemischter Grillteller	14	7 · 50.0%	0	medium
Beit Fayrouz	Hummus	1	1 · 100.0%	0	low
Beit Fayrouz	Kebab Teller	1	0 · 0.0%	0	low

Example guardrail: Al Safa Baklava has high mention volume, but its positive share—not mention count alone—must shape the interpretation.

Turn competitor visits into controlled field research

Do not visit randomly: pre-select dishes, record evidence, then convert findings into one test.

1 Select 3–5 dishes from the validated shortlist

2 Include a starter, a main/signature dish and one drink

3 Test brunch / buffet only where the concept is confirmed

4 Score arrival, menu, food, drinks, service, environment and commercial cues

5 Record price, timing, taste, presentation and appropriate visual notes

6 Discuss in the weekly review and select one controlled Al Assiel experiment

Open scorecard →

What should Al Assiel do next?

Five evidence-led moves; review the results at 30 and 90 days.

PROTECT	Taste and service positives still outnumber negatives in recent topic mentions.
INVESTIGATE	Food quality, taste and service: 10, 6 and 9 negative written low-score cases through cutoff.
TEST	One service-recovery protocol and one food-quality consistency check—each with a named owner.
VISIT	Olivenzweig brunch/drinks; Al Safa value/grill signals; Beit Fayrouz only as a cautious, small-sample reference.
MEASURE	Recent rating, low-score share, Food/Taste negative counts, response rate and reviews/week at 30/90 days.

Period definitions

Identical boundaries across all four formal restaurants

Period	Start	End	Calendar days

Drinks / bar evidence

Menu counts, review attention and recent sentiment

Restaurant	Menu items	All-time attention	Recent n	Recent +	Recent –	Evidence
Al Assiel	34	3	3	0	1	low
Olivenzweig	48	1	1	1	0	low
Al Safa	3	0	0	0	0	none
Beit Fayrouz	2	0	0	0	0	none

Validated Al Assiel count: 34 drinks / bar items—not 33. Review attention is not sales or ordering data.

← Back to source slide

Menu normalization decisions

Primary vs overlapping groups

Restaurant	Source category	Normalized	Mode	Management note
Olivenzweig	Extra Sides	Sides (5)	primary	Never shown as Other Main Dishes
Olivenzweig	Kids & Desserts	Desserts (2); Kids (1)	item-level	Items separated by type
Beit Fayrouz	Grill & Main Dishes	Grill / Meat Mains (8)	item-level	Not double-counted as Other Mains
All	Sharing / Vegetarian	Attribute groups	overlapping	Counts cannot be summed

> Every original source category remains stored. The display normalization prevents sides or shared source labels from looking like additive main-dish inventory.

← Back to source slide

Dish / favourite signal details

Top discussed item per restaurant; attention is not sales

Restaurant	Dish	n	+	+ share	–	Evidence
Al Assiel	Jordanisches Mansaf	6	2	33.3%	0	medium
Olivenzweig	Schwarztee	15	9	60.0%	2	high
Al Safa	Baklava	51	16	31.4%	0	high
Beit Fayrouz	Hummus	1	1	100.0%	0	low

> Comparative highest / lowest dish rankings require at least three qualified dishes at the 5-review threshold. Two qualified dishes are not labelled best and worst.

Al Assiel sources and conflicts

Stored sources only; no new public research

- Existing validated local Al Assiel inputs (high)
  validated_project_input

- Supplied competitive-intelligence PDF (medium)
  supplied_research

DOCUMENTED CONFLICTS

- Supplied competitive-intelligence PDF: PDF's broader captured inventory is not substituted for the validated local 118-item catalog.
- Supplied competitive-intelligence PDF: Validated comparison drink count remains Cold Drinks 15 + Hot Drinks 10 + Cocktails & Juices 9 = 34.

Olivenzweig sources and conflicts

Stored sources only; no new public research

- Olivenzweig official home (high)
  official_restaurant_website
- Olivenzweig official menu (high)
  official_owned_menu
- Olivenzweig official brunch menu (high)
  official_owned_menu
- Olivenzweig official services (high)
  official_restaurant_website
- Olivenzweig official reservations (high)
  official_restaurant_website
- Olivenzweig official contact (high)
  official_restaurant_website
- Olivenzweig delivery menu (medium)
  delivery_platform
- Google Maps target (high)
  google_business_maps

DOCUMENTED CONFLICTS

- Olivenzweig official menu: Delivery menu has some different item prices; official dine-in menu retained separately.
- Olivenzweig official contact: Some official page footers say daily while the same site also states Monday is closed; Monday retained as closed with conflict flagged.
- Olivenzweig delivery menu: Delivery prices differ from official dine-in menu on some items.
- Supplied competitive-intelligence PDF: Official-site footer/hour wording conflicts remain governed by the newer official source register.

Al Safa sources and conflicts

Stored sources only; no new public research

- Al Safa official website (medium)
  official_restaurant_website
- Speisekarte.de Al Safa menu (medium)
  current_menu_listing
- Legacy Al Safa public menu snapshot (low)
  secondary_restaurant_menu_snapshot
- Al Safa physical-menu snapshot (medium)
  supplied_physical_menu
- Speisekarte.menu PDF mirror (low)
  menu_aggregator_pdf
- Restaurant Guru Al Safa Bonn (low)
  reputable_listing
- Online Tischreservierung listing (medium)
  booking_listing
- Google Maps target (high)
  google_business_maps

DOCUMENTED CONFLICTS

- Speisekarte.de Al Safa menu: Some prices differ from the undated physical-menu extraction; the dated public value is preferred when both are present.
- Legacy Al Safa public menu snapshot: Brief says the official current menu is incomplete; treat prices as a public listing snapshot, not a guaranteed complete current menu.
- Al Safa physical-menu snapshot: Türkische Pizza: physical €5.00 vs dated public listing €6.00.
- Al Safa physical-menu snapshot: Lammkoteletts: physical €16.50 vs dated public listing €17.00.
- Speisekarte.menu PDF mirror: Snapshot date and currentness are not authoritative; not used to overwrite public website prices.
- Supplied competitive-intelligence PDF: Türkische Pizza €5 physical vs €6 dated public listing; €6 retained.
- Supplied competitive-intelligence PDF: Lammkoteletts €16.50 physical vs €17 dated public listing; €17 retained.

Beit Fayrouz sources and conflicts

Stored sources only; no new public research

- Beit Fayrouz Lieferando (medium)
  delivery_platform_menu

- Beit Fayrouz Uber Eats (medium)
  delivery_platform_menu

- Google Maps target (high)
  google_business_maps

- Opening announcement listing (low)
  reputable_listing

DOCUMENTED CONFLICTS

- Beit Fayrouz Lieferando: An older/localized Lieferando crawl showed different prices; German current snapshot dated 2026-09-21 is used for catalog prices and conflict is retained.
- Beit Fayrouz Uber Eats: Several prices differ from Lieferando; Uber values are retained in platform_signals/notes, not silently substituted.
- Opening announcement listing: Listing venue hours 12:00-24:00 differ from Uber Eats delivery hours 11:00-23:45.

Methodology and evidence thresholds

Transparent, deterministic and review-local

Rule	Implementation
Sentiment	Topic- and clause-local; overall star rating is never a sentiment fallback.
Sentiment evidence	1–4 supporting reviews = low; 5–14 = medium; 15+ = high; zero = none.
Formal benchmark	Only reviews on or before 03 Sep 2026; identical common windows.
Leader labels	Overall ≥5 reviews; topic ≥5 mentions and ≥3 positive reviews; otherwise insufficient evidence.
Dish wording	Customer attention / sentiment only; never best-seller or sales inference.
Menu groups	Primary groups are non-duplicative; overlapping attributes are flagged and never summed.
Unknown	Unknown remains unknown; absence of evidence is not converted into false.
